

Cypress™

Cypress Tech Talk

November 6, 2018

MITRE

The Office of the National Coordinator for
Health Information Technology

Agenda

- Software Updates
 - Submission Readiness Check (preliminary name)
- Recent Issues
 - CYPRESS-1498: Result Value embedded in Observation
 - CYPRESS-1503: Differing birthdates for duplicated patients in Cypress
- Cypress Versions
- Open Discussion
- Contact Information

Software Updates

Introducing, Submission Readiness Check

- **Cypress v5 will include a new feature named the Submission Readiness Check**
- **This feature seeks to address the vendor concern that the ‘certification process does not mirror a production scenario for electronic Clinical Quality Measure (eCQM) reporting’**
 - Certification uses a constrained set of test patients
 - Certification does not enforce reporting program requirements (i.e., CMS Implementation Guide)
- **The Submission Readiness Check will supplement the existing certification program**
 - Use of the Submission Readiness Check is not currently a requirement of the program

Software Updates

Submission Readiness Check – Features

- **Enhanced verification of a Health IT system's eCQM calculations**
 - Using a combination of Cypress defined patients, and “bring your own” patients
 - Calculation for multiple eCQMs at once
- **Verification of a Health IT system's ability to be configured (by a provider) to report to CMS programs**
 - Submission Readiness Check will test conformance with program specific requirements in the CMS QRDA Implementation Guides

Software Updates

Submission Readiness Check – Seeking Input

- **Cypress plans to begin development of the Submission Readiness Check this fall for preliminary release in Spring 2019**
 - Final release in Summer 2019 with Cypress v5
- **Seeking input for features to be included with the Submission Readiness Check**
- **Will discuss further at the next Tech Talk**
 - November 20, 2018

Software Updates

Bugs addressed in 4.0.1 patch release

Cypress v4.0.1

The Cypress 4.0.1 patch is scheduled for released on 10/11/18. Changelog for the release is below

Cypress Features

- Cypress bundle for the 2019 Reporting/Performance period (eCQM value sets as of September, 2018).
- Support for the 2018 CMS Quality Reporting Document Architecture (QRDA) Category III Implementation Guide.

Cypress Bugs Addressed

- Misrepresentation of ongoing events in HTML. ([CYPRESS-1450](#))
- Calculation of patient Z21 GP Adult for CMS249 does not account for race. ([CYPRESS-1461](#))
- Cypress's relative positioning of the "Negation Reason" in the Device, Order template impacts patient import. ([CYPRESS-1443](#))
- C4 Problem filter not properly excluding patients without required diagnosis. ([CYPRESS-1480](#))
- Duplicate Patients have significantly different date of births, impacting calculation depending on which date of birth is selected. ([CYPRESS-1483](#))
- Master Patient List download does not contain patient files.
- 'Race Condition' in C2 setup may cause the Expected Results to be calculated with a subset of patient records. ([CYPRESS-1488](#))

CYPRESS Issue Tracker / CYPRESS-1453

CMS 68v8 patient w/duplicate episodes counting individually

Key	Summary	T	Status	Created	Assignee
CYPRESS-1477	Device Order Element structure	o	CLOSED	09/24/18	David Czulada
CYPRESS-1461	Z21 GP Adult race code mismatch, possible miscalculation	o	IN PROGRESS	09/09/18	David Czulada
CYPRESS-1453	CMS 68v8 patient w/duplicate episodes counting individually	o	IN PROGRESS	08/23/18	David Czulada
CYPRESS-1443	Device, Order negation author/time is missing and seems to be causing an issue	o	IN PROGRESS	07/23/18	David Czulada

Cypress v4.0.0, I find a specific patient (Z9 N BH Adult) appears to have . But, upon closer inspection, two of the episodes have the same CPT codes. The only difference I see between the two is the inclusion of a but not the other. Since there is no diagnosis requirement for this as these are duplicated to one another and only counts 4 unique

Recent Issue

CYPRESS-1498: Result Value embedded in Observation

■ Precondition

- A Cypress 4.0.1 instance
- Measures with an Assessment, Performed with a “Result”
 - Ex: CMS149v7, CMS56v7, CMS66v7

■ Issue

- Cypress exports patients for these measures that contain Assessment, Performed elements with a “Result” value
- The result is embedded in an Observation
- QRDA Category I R5 expects the Result in the top level Assessment element

■ Workaround:

- Read the result value from the Observation element
- Same location as QRDA I R4

```

<entry>
  <observation classCode="OBS" moodCode="EVN" >
    <!-- Assessment Performed -->
    <templateId
root="2.16.840.1.113883.10.20.24.3.144" extension="2017-08-01"
/>
    ...
    <entryRelationship typeCode="REFR">
      <observation classCode="OBS" moodCode="EVN">
        <!-- Conforms to C-CDA R2 Result
Observation (V2) -->
        <templateId
root="2.16.840.1.113883.10.20.22.4.2" extension="2015-08-01"/>
        ...
        <value xsi:type="PQ" value="35.3"
unit="%"/>
      </observation>
    </entryRelationship>
  </observation>
</entry>

```

```

<observation classCode="OBS" moodCode="EVN">
  <templateId root="2.16.840.1.113883.10.20.22.4.2"
extension="2015-08-01" />
  <value xsi:type="PQ" value="35.3" unit="% " />
  ....
</observation>

```

Should be:

```

<value xsi:type="PQ" value="35.3" unit="% " />

```

Recent Issue

CYPRESS-1503: Differing birthdates for duplicated patients in Cypress

■ Precondition

- A Cypress 4.0.1 instance
- The following measures
 - CMS82v6, Maternal Depression Screening
 - CMS52v7, HIV/AIDS PCP Prophylaxis
 - Measures where age is calculated with sub-year precision (Month, Week, Day)

■ Issue

- When duplicating patients, Cypress can (but does not always) change the birthdate
- Normally, this doesn't affect measure calculation
- However, occasionally the “duplicated” patient's birthdate will change measure results for the patient

■ Workaround: use the birthdate as shown in “View Patients”

- This is the “correct” birthdate for measure calculation purposes
- If need be, reach out to the test proctor to acquire this information

▲ Turns 6 Months of Age During Measurement Period

```
["Patient Characteristic Birthdate"] BirthDate
  where "CalendarAgeInMonthsAt"(BirthDate.birthDatetime, start of "Measurement Period") < 6
    and "CalendarAgeInMonthsAt"(BirthDate.birthDatetime, end of "Measurement Period") >= 6
```

Cypress Versions

Version	Dates	Measures Supported
V 3.2.3	December 14, 2017	Support for the eQMs for the 2018 Reporting/Performance Period *will be supported alongside Cypress v4
V4.0.1	October 11, 2018	Support for the eQMs for the 2019 Reporting/Performance Period Support for Clinical Quality Language (CQL) calculation

Bundle Version	Dates	Features
2017.0.3	April 24, 2018	Cypress v3 only “Z1 BH Adult” updated for CMS128v6
2017.0.4	September 25, 2018	Cypress v3 only Errata update to fix ‘Download All Patients’ feature when 2017.0.3 and 2017.0.2 are installed simultaneously
2018.0.1	July 26, 2018	Cypress v4 only CQL-based measures released in 2018 for the 2019 reporting year eCQM Value Sets as of 5/4/2018.
2018.1.0	October 11, 2018	Cypress v4 only CQL-based measures released in 2018 for the 2019 reporting year eCQM Value Sets as of 9/17/2018.

OPEN DISCUSSION

Next Cypress Tech Talk

- **Tuesday, November 20, 2018 at 1pm ET**
- **See the Cypress website (below) for updated registration information**
- **Completed Webinars will be posted on the Cypress Website on the Timeline Tab**
 - <https://www.healthit.gov/cypress/techtalks.html>
- **Send questions and feedback to the Cypress Talk List at**
 - project-cypress-talk@googlegroups.com
- **Report bugs and issues to the Cypress JIRA at**
 - <https://oncprojecttracking.healthit.gov/support/browse/CYPRESS>
