## *Software Updates*

# Cypress 5.2.0 Release

- **A 5.2.0 patch release for Cypress was released on December 19, 2019**
- **Cypress Features**
  - Addresses changes made in the December 2019 update to the 2020 CMS QRDA I Implementation Guide.
  - Ability to edit attributes used for C1 Record Sample tests.
  - Bundle Update 2019.1.1: Removed four retired measures
    - Removed CMS52v8, CMS82v7, CMS132v8, CMS160v8
- **Cypress Bugs Addressed**
  - Address calculation discrepancies for CMS165v8 due to ordering of Physical Exams (CYPRESS-1868)

# 2020 CMS QRDA I Implementation Guide Updates

- <https://ecqi.healthit.gov/sites/default/files/QRDA-HQR-2020-CMS-IG-v1.1-508.pdf>
- **Negated entries MUST negate a valueset or direct reference code**
- **Previously, Cypress allowed single code negation. This update enforces a warning or error when a valueset should be used.**

## 5.2.3.1 “Not Done” with a Reason

To report a QDM data element that is not done (when `negationInd="true"`) with a reason, such as "Medication Not Administered" with negation rationale attribute indicating it is due to patient reason, the following steps must be followed:

1. Must set the attribute `negationInd="true"`
2. If QDM in eCQM specification is defined using a value set, for example, ["Medication, Not Ordered": "Warfarin"]:
  - Must provide `code/[@nullFlavor="NA"]`
  - Must provide the value set OID instead of a specific code from the value set. Set the code attribute `code/sdtc:valueset="[VSAC value set OID]"`
    - Use `code/originalText` for the text description of the concept in the pattern "None of value set: [value set name]"

## Software Updates

# Editable C1 Record Sample Test Attributes

- Select “Edit Test” for a C1 Record Sample Test
- Cypress will allow the user to swap the attribute (in addition to the criteria swap option)
- Attributes are shown with valueset oid if the attribute has an associated valueset

## Recent Issue

# Cypress 5.1.0 Known Issue

- CYPRESS-1868
- CMS165v8
  - <https://ecqi.healthit.gov/ecqm/ep/2020/cms165v8>
  - CQL includes “\$” sort of Blood Pressure exam
- Cypress calculates differently based on the order of entries
  - Issue in the calculation engine
  - Engine does not sort entries properly in order to find the most recent
- Current workaround is to re-order entries

CQL:

```
Last( "Blood Pressure Days" BPDays
      sort by $this
    )
```

Affects measured blood pressure entries:

# Announcements

- **Now Available: New Modules on the CMS Measure Collaboration Workspace**
  - The Centers for Medicare & Medicaid Services (CMS) is excited to announce the availability of the [Measure Collaboration \(MC\) Workspace](#). The December 2019 release includes three new modules to the MC Workspace: eCQM Concepts, New eCQM Clinical Workflow, and eCQM Test Results. The MC Workspace is made up of four modules to support measure collaboration:
    - eCQM Concepts allows users to search existing measure inventories and submit new measure concepts for consideration
    - New eCQM Clinical Workflow allows users to review sample clinical workflows associated with new eCQMs and an opportunity to provide feedback on anticipated challenges
    - The eCQM Data Element Repository provides data definitions to aid in measure implementation and data mapping
    - eCQM Test Results provides transparency into how measures are tested and allow users to express interest in participating in eCQM testing activities

For additional information, visit the Frequently Asked Questions at <https://ecqi.healthit.gov/mcw-faqs>. CMS encourages users to explore the [Measure Collaboration \(MC\) Workspace](#) and provide feedback at [ecqi-resource-center@hhs.gov](mailto:ecqi-resource-center@hhs.gov).
