## De-duplication Features

### ■ Address Changes

- Previously, Cypress created all patients with the same address
- Cypress update creates patients with different addresses, where addresses will not be changed when duplicating patients

### ■ Birthdate Changes

- Previously, birthdate was often changed in duplicate patients to a random date in a range from the original patient birthdate
- Updates make birthdate changes less common
- Birthdate changes only update the \*day\* while keeping the month and year the same
