De-duplication Features

- **Address Changes**
  - Previously, Cypress created all patients with the same address
  - Cypress creates patients with different addresses, where addresses will not be changed when duplicating patients

- **Birthdate Changes**
  - Previously, birthdate was often changed in duplicate patients to a random date in a range from the original patient birthdate
  - Updates make birthdate changes less common
  - Birthdate changes only update the *day* while keeping the month and year the same
Software Updates

  - Previously, the Cypress Validation Utility provided simple validation with the HL7 schematron
  - Users have expressed continued interest in HL7 validation
