Cypress Tech Talk

August 24, 2021

MITRE

The Office of the National Coordinator for
Health Information Technology

Agenda

- Software Updates
 - Cypress 6.2.1
- Recent Issue
 - Cypress Known Issues Dashboard
 - eCQM Known Issues Dashboard
- Cypress Versions
- Open Discussion
- Contact Information

*See the Glossary at the back for definitions of terms

Software Updates

Cypress 6.2.1

■ **Cypress 6.2.1**

- Released 7/22/21
- Supports both the 2021 bundle (for the 2022 reporting period) and the 2020 bundle (for the 2021 reporting period)

■ **Features**

- 2022 CMS Implementation Guide for Quality Reporting Document Architecture Category III - Implementation Guide for 2022
- Displays metadata for failing test uploads (CYPRESS-2268)

■ **Bugs Addressed**

- CCDE validator required uppercase version specific ID (CYPRESS-2273)
- Full Test Deck Download failure for C4 tests (CYPRESS-2270)

Recent Issue

Cypress Known Issues Dashboard

- <https://oncprojecttracking.healthit.gov/support/secure/Dashboard.jspa?selectPageId=18000>
- The dashboard collects all labeled known issues in one place, sorted by Cypress version
- Easily navigate to the dashboard from the Cypress summary page

Cypress Known Issues

Filter Results: Cypress Known Bugs 6.2.0

Summary

2022 Performance Period EP/EC eQMs

2022 Reporting Period EH/CAH eQMs

Solution

[Cypress 6.2.0] Full Test Deck
Download Fails After Updating To
6.2.0

Re-running the update script should fix this issue.

eCQM Known Issues Dashboard

- The eCQM Known Issues Dashboard provides implementation information for eCQMs with known technical issues for which a solution is under development but not yet available in a published eCQM specification
- Issues on the eCQM Known Issues [dashboard](#) include discrepancies between eCQM narrative and logic, value sets, and/or technical, standard, or logic-related issues for EH/critical access hospital (CAH) and eligible provider/eligible clinician (EP/EC) eCQM
- Visit the [eCQM Known Issues dashboard](#) at <https://oncprojecttracking.healthit.gov/support/secure/Dashboard.jspa?selectPageId=10000> to learn more
- Note: The implementation information does not (and should not be perceived to) replace regulatory guidance. For questions related to eCQM implementation specifications, logic, data elements, standards, or tools, please use the [eCQM Tracker](#) in the [ONC Project Tracking System \(Jira\)](#): <https://oncprojecttracking.healthit.gov>

Recent Issue

eCQM Known Issue EKI-12

■ EKI-12

- <https://oncprojectracking.healthit.gov/support/browse/EKI-12>
- **eCQMs Impacted** – CMS145v9/CMS145v10 - Coronary Artery Disease (CAD): Beta-Blocker Therapy-Prior Myocardial Infarction (MI) or Left Ventricular Systolic Dysfunction (LVEF <40%)
- **Issue** – Measure logic may not restrict patients to a single population if they have both myocardial infarction (MI) within the past 3 years and a current or prior LVEF < 40% (or moderate or severe LVSD), and the LVSDFindings start after the first qualifying encounter and before the end of the second qualifying encounter.

Measure:

▲ Denominator 1

"Initial Population"
and exists "Qualifying CAD Encounter and Moderate or Severe LVSD"

▲ Denominator 2

"Initial Population"
and exists "Qualifying CAD Encounter and Prior MI"

Stated Guidance:

If a patient has had a myocardial infarction (MI) within the past 3 years and a current or prior LVEF < 40% (or moderate or severe LVSD), the patient should only be counted in Population Criteria 1.
