

United States Core Data for Interoperability

— FEBRUARY 2020 • VERSION 1 —

The Office of the National Coordinator for
Health Information Technology

The USCDI is a standardized set of health data classes and constituent data elements for nationwide, interoperable health information exchange.

A USCDI “Data Class” is an aggregation of various Data Elements by a common theme or use case.

A USCDI “Data Element” is the most granular level at which a piece of data is represented in the USCDI for exchange.
