

The Interoperability Standards Advisory: Engaging with Stakeholders to Advance Interoperability

Brett Andriesen
Program Analyst, HIT Infrastructure and Innovation Division
Office of Standards and Technology

ONC Annual Meeting
November 30, 2017

What is the ISA?

- A single, public list of the standards and implementation specifications that can best be used to address specific interoperability needs.
- Reflects the results of ongoing dialogue, debate, and consensus among industry stakeholders.
- Document known limitations, preconditions, and dependencies as well as other helpful information.

- Introduction
- Section I: Vocabulary/Code Set/Terminology
- Section II: Content and Structure
- Section III: Services
- Section IV: Models and Profiles
- Section V: Administrative 
 - » Under each section, there are Subsections with various Interoperability Needs
 - » Specific standards and implementation specifications support each Interoperability Need

- Characteristics and other helpful information for each standard and implementation specification
 - » Standards Process Maturity
 - » Implementation Maturity
 - » Adoption Level
 - » Federally Required
 - » Cost
 - » Test Tools
 - » Limitations, Dependencies, Preconditions and Other Qualifying Information
 - » Applicable Value Set(s) and Starter Set(s) and Security Patterns
- Appendixes for “Sources for Privacy and Security Standards” and Educational / Informational Resources

Electronic Transmission of Reportable Lab Results to Public Health Agencies

Type	Standard Implementation/Specification	Standards Process Maturity	Implementation Maturity	Adoption Level	Federally required	Cost	Test Tool Availability
Standard	HL7 2.5.1	Final	Production	●●○○○	Yes ↗	Free	No
Implementation Specification	HL7 Version 2.5.1: Implementation Guide: Electronic Laboratory Reporting to Public Health (US Realm), Release 1 with Errata and Clarifications and ELR 2.5.1 Clarification Document for EHR Technology Certification	Final	Production	●●●●○ Rating: 4 out of 5	Yes ↗	Free	Yes ↗
Emerging Implementation Specification	HL7 Version 2.5.1 Implementation Guide: Electronic Laboratory Reporting to Public Health, Release 2 (US Realm), Draft Standard for Trial Use, Release 1.1	Balloted Draft	Pilot	Feedback Requested	No	Free	No

Limitations, Dependencies, and Preconditions for Consideration	Applicable Security Patterns for Consideration
<ul style="list-style-type: none"> Stakeholders should refer to the health department in their state or local jurisdiction to determine onboarding procedures, obtain a jurisdictional implementation guide if applicable, and determine which transport methods are acceptable for submitting ELR as there may be jurisdictional variation or requirements. The Emerging Implementation Specification: "HL7 Version 2.5.1 Implementation Guide: Electronic Laboratory Reporting to Public health, Release 2 (US REALM), Draft Standard for Trial Use, Release 1.1" listed above was in a Draft Standard for Trial use status, but was not renewed or balloted as normative. However, a recommendation was received to leave it listed here until there is wider adoption/experience with other listed specifications. See HL7 V2 projects in the Interoperability Proving Ground. 	<ul style="list-style-type: none"> Secure Communication - create a secure channel for client-to-server and server-to-server communication. Secure Message Router - securely route and enforce policy on inbound and outbound messages without interruption of delivery. Authentication Enforcer - centralized authentication processes. Authorization Enforcer - specifies access control policies. Credential Tokenizer - encapsulate credentials as a security token for reuse (e.g., - SAML, Kerberos). Assertion Builder - define processing logic for identity, authorization and attribute statements. User Role - identifies the role asserted by the individual initiating the transaction. Purpose of Use - Identifies the purpose for the transaction.

How should the ISA be used?

- Stakeholders who administer government and non-governmental procurements, testing, certification or grant programs to look first to the ISA to meet their interoperability needs.
- The ISA and their associated informative characteristics are also available to help more fully inform policy.

Welcome to Interoperability Standards Advisory (ISA)

[Section I](#) | [Section II](#) | [Section III](#) | [Section IV](#) | [Section V](#)

▶ I-A: Allergies and Intolerances

▶ I-B: Encounter Diagnosis

▶ I-C: Family Health History

▶ I-D: Functional Status/Disability

▶ I-E: Health Care Providers

▶ I-F: Imaging (Diagnostics, Interventions and Procedures)

▶ I-G: Immunizations

▶ I-H: Industry and Occupation

▶ I-I: Lab Tests

▶ I-J: Medications

▶ I-K: Units of Measure

▶ I-L: Nursing

▶ I-M: Patient Clinical "Problems" (i.e., conditions)

▶ I-N: Preferred Language

▶ I-O: Procedures

▶ I-P: Race and Ethnicity

▶ I-Q: Research

- The web-based version of the ISA is updated frequently throughout the year, as new comments from stakeholders come in or as changes occur, with a call for comments in Fall timeframe.
- Specific SMEs have ownership of subsections of the ISA that are empowered to analyze public comments and make changes as necessary
- ONC will annually publish a static “Reference Edition” of the ISA that can be referenced in contracts, agreements, or as otherwise needed with certainty that the information will not change.
 - » ONC is currently reviewing comments received in advance of 2018 Reference Edition publication.

Various Changes to the ISA in 2017

- **Functionality**

- » Advanced search and filter of ISA contents (various characteristics)
- » Subscribe to alerts for when changes are made to the ISA
- » Capture more information about experiences with the standards
- » Ability to “suggest” new Interoperability Needs for addition
- » Mobile-optimized site navigation
- » Print-friendly features at page/full ISA level
- » Revision history available at page level.

- **Content**

- » Better addressing interoperability needs for Consumer/Patient Access
- » Addition of Administrative Standards
- » Continued growth expansion of interoperability needs
- » Improve upon how privacy and security is addressed
