*Coming Soon

SIM SUPPORT

- SDOH Screenings
  - Built into stakeholder EMRs / care management systems
  - Central collection of social need screening data for reporting and assessment of service gaps
- ED Super-Utilizer Reports
  - Identify collective utilization across 3 EDs in community
  - Distributed to applicable health plans, ASCs
  - Community-level care management collaboration and coordination discussions for individuals on report

SIM SUPPORT-2

- Community Care Linkages
  - Closed loop referral platform
  - Physical, behavioral & social service agencies
  - Person-level tracking & reporting of referrals, results and associated process data
- Cross-Community Health Record
  - Care plan upload and availability to support care management coordination
  - Single person record to make more of a person's "story" available wherever they show up for care
