

The Office of the National Coordinator for
Health Information Technology

Interoperability: Supporting Care Before, During and After a Disaster

November 30, 2017

ONC 2017 Annual Meeting

Agenda

- Brief Panel Introductions
- Panel Presentations (15 minutes each)
- Q&A/Interactive Discussion with Panel

Panel Introductions

- Panelists
 - » Andy Gettinger, Chief Clinical Officer, Office of the National Coordinator for Health Information Technology
 - » Kevin Horahan, Deputy Division Director, The Office of the Assistant Secretary for Preparedness and Response
 - » Caecilia Blondiaux, Health Insurance Specialist, Centers for Medicare & Medicaid Services
 - » Dan Smiley, Chief Deputy Director, State of California Emergency Medical Services Authority
 - » Leslie Witten, Health Information Exchange Program Manager, State of California Emergency Medical Services Authority
 - » Luis Belen, Chief Executive Officer, National Health IT Collaborative for the Underserved

The Office of the National Coordinator for
Health Information Technology

Andrew Gettinger, M.D.

Chief Medical Information Officer

Office of the National Coordinator for Health IT

Health Information and Disaster Response

Kevin Horahan, JD, MPH, NRP
Deputy Division Director
Partner Readiness and Emergency Programs
Office of Emergency Management
Assistant Secretary for Preparedness and Response
U.S. Department of Health and Human Services

US Department of Health and Human Services

- Administers more grant dollars than all other federal agencies combined
- The Department's programs are administered by 11 operating divisions and 16 staff divisions
- HHS' Medicare program is the nation's largest health insurer, handling more than 1 billion claims per year. Medicare and Medicaid together provide health care insurance for one in four Americans.
- The department includes more than 300 programs, covering a wide spectrum of activities.
- HHS programs provide for equitable treatment of beneficiaries nationwide, and they enable the collection of national health and other data.

US. Department of Health and Human Services Organization Chart - text version

Assistant Secretary for Preparedness and Response (ASPR)

- Created and reauthorized by the Pandemic and All-Hazards Preparedness Act.
- Lead the nation in preparing for and responding to the adverse health effects of public health emergencies and disasters (ESF8 of the NRF).
- ASPR Primary Focus Areas:
 - Preparedness planning and response
 - Building federal medical operational capabilities
 - Countermeasure research, advanced development, and procurement
 - Grants to strengthen the capacities of health systems
- Guided by the National Health Security Strategy.

Robert Kadlec MD
Assistant Secretary for Preparedness and Response
U.S. Department of Health and Human Services

Partner Readiness and Emergency Programs (PREP)

Mission

- The mission of the PREP Division is to support external engagement with our federal, local, state, tribal, territorial and international partners “outside the walls of HHS” in preparing for, mitigating against and responding to public health emergencies, terrorist incidents and natural disasters.

Vision

- A consolidated, integrated footprint led by highly qualified personnel capable of representing ESF8/ASPR/OEM as liaison officers (LNOs) across all phases of the emergency management cycle based on a common skillset augmented by specialized skillsets.

PREP Responses 2010-2016

2010 Public Health and Medical Incidents

- Haiti Earthquake - Haiti
- Chile Earthquake - Chile
- Red River Basin - ND
- Northeast Flooding - RI, MA, CT
- Montana Flooding - MT
- Hurricane Alex - TX
- Tropical Storm Bonnie - FL, LA
- Hurricane Earl - Puerto Rico, NC, VA, MD, NJ, CT, RI, MA
- Haiti Cholera Outbreak - Haiti
- State of the Union Address - Washington D.C.
- Winter Olympics - Vancouver BC, Canada
- Cherry Blossom Festival - Washington D.C.
- Global Nuclear Security Summit - Washington D.C.
- Annual Peace Officers Memorial - Washington D.C.
- Central American and Caribbean Games - Puerto Rico
- World Equestrian Games - KY
- Super Bowl XLIV - TX
- Independence Day - Washington D.C.
- NLE: Eagle Horizon - Washington D.C.

2011 Public Health and Medical Incidents

- Asia-Pacific Economic Cooperation (APEC) - HI
- Pacific Basin Earthquake/Tsunami - Japan
- Red River Basin Flooding - ND, MN
- Mississippi River Flooding - MS
- Severe Weather - AL, GA
- Winter Weather - NM, TX, OK, CO, KS, MO, AR, IL, IN, OH, KY, WV, PA, MD, DE, Washington D.C., NY, MA, VT, NH, ME
- New England Severe Weather/Tornado - MA
- Missouri River Flooding - SD
- Southern Flooding - TN
- Northeast Flooding - NY
- Hurricane Irene - Puerto Rico, SC, NC, VA, MD, DE, N.J., NY
- Joplin Tornado - MO

2012 Public Health and Medical Incidents

- Aurora Shootings - CO
- Sikh Temple Shootings - WI
- Sandy Hook Shootings - CT
- RNC - FL
- DNC - NC
- Severe Winter Storms - IA, WI, IL, MI, MO, MN
- NATO Summit - IL
- Peace Officers Memorial - DC
- State of the Union Address - DC
- Hurricane Isaac - USVI, PR, FL, LA, MS, AR, MO
- Hurricane Sandy - NJ, PA, NY
- Severe Weather - KS, MO, IL, KY, IN, TN, AL, GA
- Tropical Storm Debby - FL, GA
- EPA Medical Support - MA
- Texas CCF Support Mission - TX
- Mid-Atlantic/Ohio Valley Storms - MD, OH, VA, WV
- Tropical Storm Evan - American Samoa
- Exercise Thunderbolt - DC
- Eagle Horizon - DC
- Noble Listerine Patient Movement Exercise - WI
- Pandemic Influenza Exercise - DC
- Multi-State Anthrax Exercise - DC
- Cherry Blossom Festival - DC
- Independence Day - DC
- UN General Assembly - NY, NJ

2013 Public Health and Medical Incidents

- Inauguration - DC
- Boston Marathon Bombing - MA
- Typhoon Haiyan/Yolanda - Philippines
- State of the Union - DC
- Peace Officers Memorial - DC
- Independence Day - DC
- Anniversary March on Washington - DC
- Sandy Hook Elementary - CT
- American Samoa Storm - American Samoa
- Nationwide
- Northeast Winter Storm - ME, NH, MA, NY, NJ, PA, VT, CT, RI
- West Texas Fertilizer Plant Explosion - TX
- Tropical Storm Andrea - FL, GA, SC, NC, VA, MD, DE, NJ, CT, RI, MA, ME
- H7N9 - China
- Central and Midwest Flooding - MI, IN, IL, WI, MN, IA, MO, KY, TN, SD, ND
- Oklahoma City Tornado - OK
- MERS-CoV - Entire Middle East
- Arizona Wild Fire - AZ
- CO Flash Flooding - CO
- Tropical Storm Karen - LA
- Midwest Ice Storm - TX, AR, TN, KY, OH, MS
- Arctic Sentry - DC
- Period of Heightened Alert - DC

2014 Public Health and Medical Incidents

- UC Mission
- Sandy Hook Elementary - CT
- American Samoa Storm - American Samoa
- Nationwide
- Northeast Winter Storm - ME, NH, MA, NY, NJ, PA, VT, CT, RI
- West Texas Fertilizer Plant Explosion - TX
- Tropical Storm Andrea - FL, GA, SC, NC, VA, MD, DE, NJ, CT, RI, MA, ME
- H7N9 - China
- Central and Midwest Flooding - MI, IN, IL, WI, MN, IA, MO, KY, TN, SD, ND
- Oklahoma City Tornado - OK
- MERS-CoV - Entire Middle East

- Orion, Eastern Pacific Ocean

Resilient People. Healthy Communities. A Nation Prepared.

Preparedness Support

- Lead HHS support to local and state health departments preparedness efforts; co-chair the HHS Regional Advisory Committee (RAC)
- Coordinate Federal health and medical (ESF #8) regional preparedness and crisis management among federal agencies
- Serve as technical advisers for national and regional policy development; linkages to best practices and resources
- Participate in state, regional and cross-border planning, training, exercises and program evaluation for public health disasters, emergencies and mass gathering events

Response Operations

- Serve as the lead for HHS/Federal ESF #8 Health Official in affected region
- Work closely with state health departments to estimate requirements for federal support
- Identify, validate and execute federal ESF #8 response missions domestically and with international or cross-border partners
- Maintain regional readiness for additional missions during response

Recovery

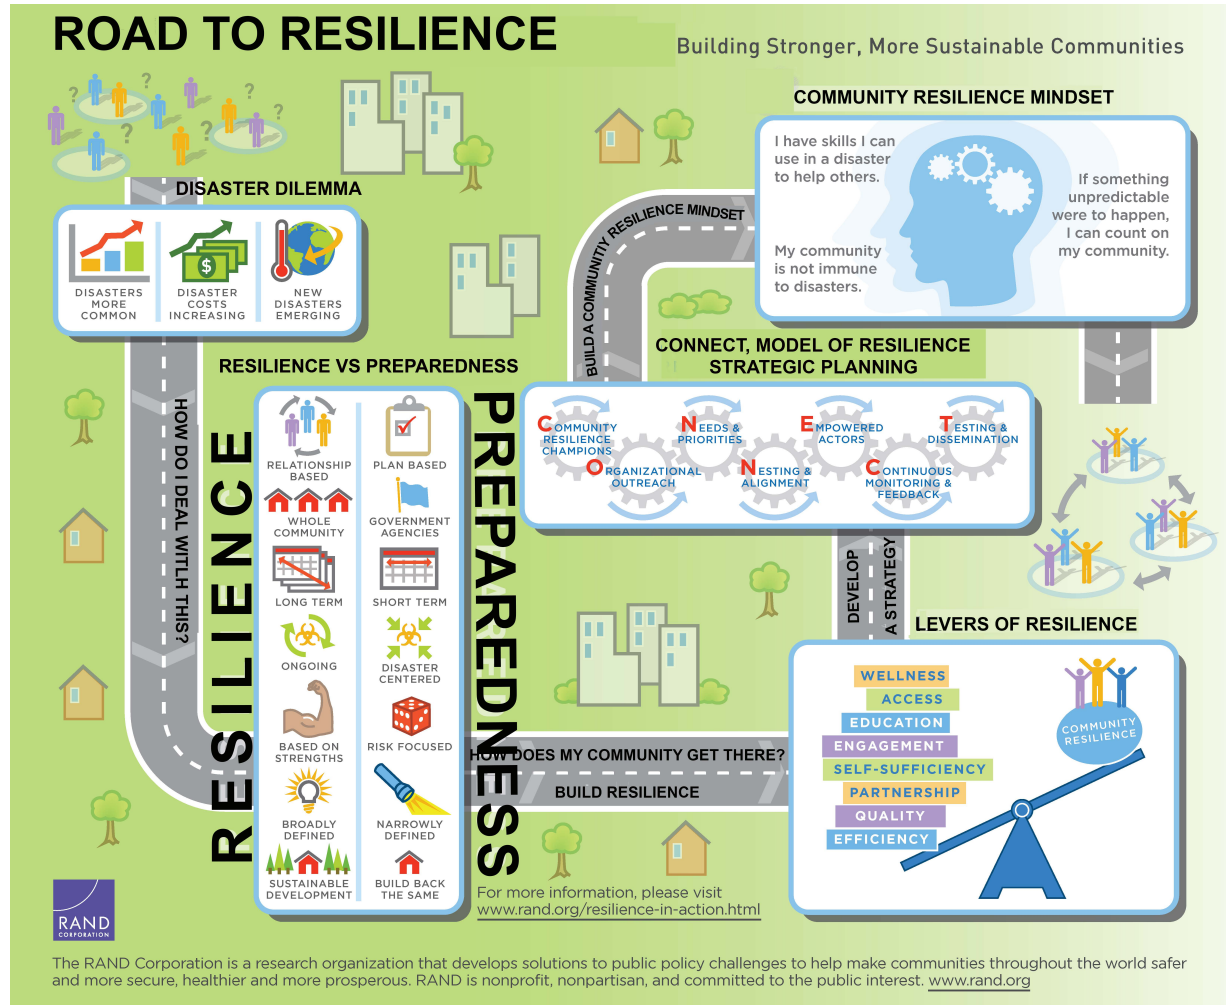

- Ensure HHS Recovery Coordinator situational awareness and integration into response operations
- Assist with transition from response/short-term recovery to Long Term Recovery Operations
- Identify potential ongoing recovery missions such as vector control, behavioral health support

Mitigation

- Provide feedback and implement best practices/lesson learned in home region
- Work with partners on efforts related to disaster risk reduction – focusing on business continuity planning and critical infrastructure

How do we get there?

Why do we care?

Investments in resiliency pay off

Every \$1 spent on disaster resiliency yields \$4 in future benefits

CMS Emergency Preparedness Rule

Understanding the Emergency Preparedness Final Rule

Caecilia Blondiaux

***Survey & Certification Group
Centers for Medicare &
Medicaid Services***

Final Rule

- *Medicare and Medicaid Programs; Emergency Preparedness Requirements for Medicare and Medicaid Participating Providers and Suppliers*
- Published September 16, 2016
- Applies to all 17 provider and supplier types
- Implementation date November 15, 2017
- Compliance required for participation in Medicare
- Emergency Preparedness is one new CoP/CfC of many already required

Background

- The Regulation was 10 years in the making
- Lessons Learned from disasters
 - Hurricane Katrina
 - Hurricane Sandy
 - 9/11 Terrorist Attacks
 - Anthrax attacks
 - H1N1 influenza pandemic
 - Ebola
- Previous plans or requirements did not go far enough to ensure that providers and suppliers are equipped and prepared to help protect those they serve during emergencies and disasters.

Lessons from SS Sandy

<https://oig.hhs.gov/oei/reports/oei-06-13-00260.pdf>

- **1" of water entered the hospital, which compromised the back-up generator, forcing evacuation when the hospital lost power.**

Fuel Bucket Line

Back-up generators in 13th floor but fuel pumps located in the flooded basement, requiring a bucket line up 13 flights of stairs.

Lessons Learned

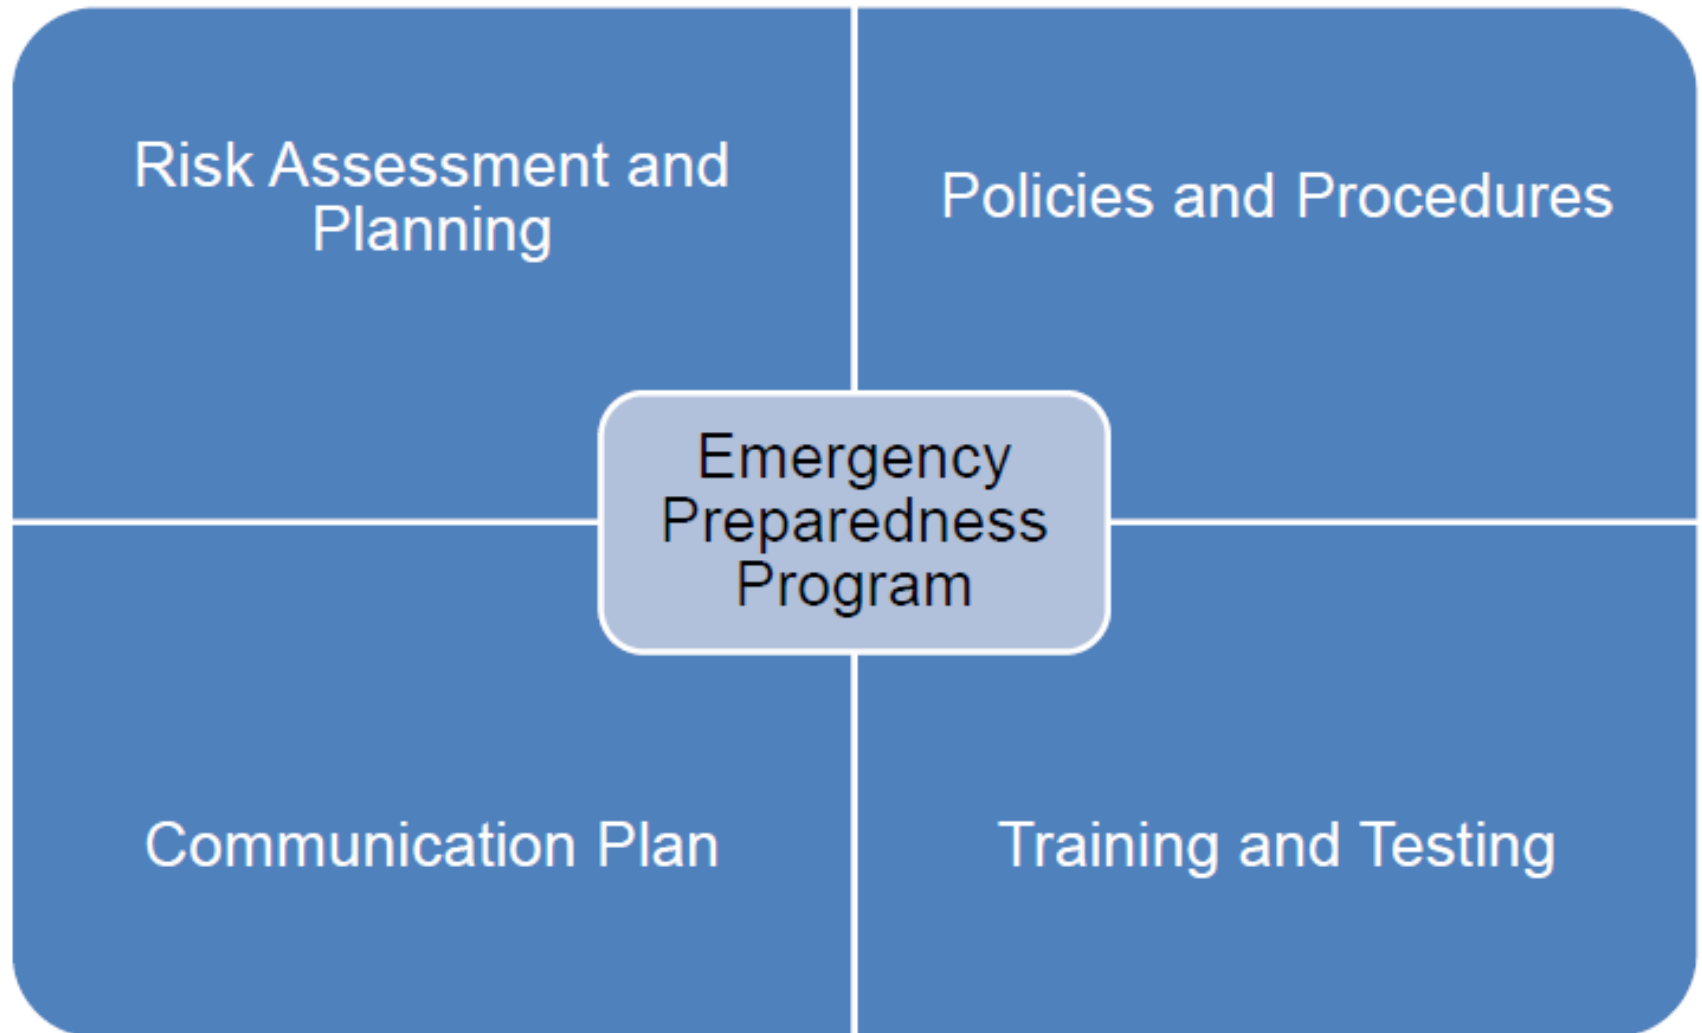

- Problems with community collaboration to secure fuel, transportation
- Loading order (acute/vent patients in back of buses, longer wait). Difference between planned evacuation (hospital) vs emergency evacuation (EMS).
- Poor bed tracking/availability.

Lessons Learned

- Staff Training: Newer nurses had little knowledge of alternative procedures, such as visually counting IV drips and performing manual suction of intubated patients.
- **Records, both electronic and paper were destroyed by basement flooding.** Many patients records communicated only through oral histories provided by caregivers.
- Compromised communications, including landlines, internet and cell phones.

Four Provisions for All Provider Types

Risk Assessment and Planning

- Develop an emergency plan based on a risk assessment.
- Perform risk assessment using an “all-hazards” approach, focusing on capacities and capabilities.
- Update emergency plan at least annually.

All-Hazards Approach:

- An all-hazards approach is an integrated approach to emergency preparedness planning that focuses on capacities and capabilities that are critical to preparedness for a full spectrum of emergencies or disasters, including internal emergencies and a man-made emergency (or both) or natural disaster. This approach is specific to the location of the provider or supplier and considers the particular type of hazards most likely to occur in their areas. **These may include, but are not limited to, care-related emergencies, equipment and power failures, interruptions in communications, including cyber-attacks, loss of a portion or all of a facility, and interruptions in the normal supply of essentials such as water and food.**

Policies and Procedures

- Develop and implement policies and procedures based on the emergency plan and risk assessment.
- Policies and procedures must address a range of issues including subsistence needs, evacuation plans, procedures for sheltering in place, tracking patients and staff during an emergency.
- A system to preserve medical documentation (ensures confidentiality in compliance with HIPAA)
- Review and update policies and procedures at least annually.

Communication Plan

- Develop a communication plan that complies with both Federal and State laws.
- Coordinate patient care within the facility, across health care providers, and with state and local public health departments and emergency management systems.
- Review and update plan annually.

Training and Testing Program

- Develop and maintain training and testing programs, including initial training in policies and procedures.
- Demonstrate knowledge of emergency procedures and provide training at least annually.
- Conduct drills and exercises to test the emergency plan.
- Participation in a full-scale exercise that is community-based or when a community-based exercise is not accessible, an individual, facility-based exercise.

Training & Testing Requirements

- Facilities are expected to have met all Training and Testing Requirements by the implementation date (11/15/17).
- Conduct an additional exercise that may include, but is not limited to the following:
 - A second full-scale exercise that is individual, facility-based.
 - A tabletop exercise that includes a group discussion led by a facilitator, using a narrated, clinically-relevant emergency scenario, and a set of problem statements, directed messages, or prepared questions designed to challenge an emergency plan.

Other Areas of Importance

- Final Rule is based off of the Hospital Conditions, with variations-
 - Outpatient providers are not required to have policies and procedures for the provision of subsistence needs
 - Home health agencies and hospices required to inform officials of patients in need of evacuation.
 - Long-term care and psychiatric residential treatment facilities must share information from the emergency plan with residents and family members or representatives.

Where are we now?

- In June, 2017, Appendix Z of State Operations Manual was released.
- In September, 2017, the surveyor training for emergency preparedness requirements was launched. Available at <https://surveyortraining.cms.hhs.gov/>
- Training through the Integrated Surveyor Training Website is available for providers/suppliers.
- Our Website <https://www.cms.gov/Medicare/Provider-Enrollment-and-Certification/SurveyCertEmergPrep/index.html>

Do not lose sight of the intent!

- The intent behind the emergency preparedness final rule is to collaborate and coordinate with emergency officials to improve patient access to care and continuing care during disasters.
- Facilities are encouraged to use one another, healthcare coalitions, public health departments, emergency preparedness experts to gain compliance, share lessons learned and best practices.
- Don't recreate the wheel!

Thank you!

Welcome to the Disaster Healthcare Volunteers Site

Username:

Password:
 [Log In](#)

>> [Forgot Username or Password?](#)
>> [Not Registered?](#)
>>

>> If you have already completed the registration process or wish to return to a registration which you've started but not completed, you can log in and update your profile.

Here you'll find the online registration system for medical and healthcare volunteers.

If you're a healthcare provider with an active license, a public health professional, or a member of a medical disaster response team in California who would like to volunteer for disaster service, you've come to the right place!

What does it take to register for disaster service?

1. During the on-line registration process, you will be asked to enter information regarding your license (if applicable).
2. Enter information about the best way to contact you, and other relevant background information.
3. Once you've registered, your credentials will be validated - before an emergency - so that you can be deployed quickly and efficiently. Your information will only be viewed by authorized system managers.

Once I'm registered, what happens next?

1. During a State or national disaster, (e.g., an earthquake severe weather event, or public health emergency), this system will be accessed by authorized medical/health officials at the State Emergency Operations Center or your county.
2. If a decision is made to request your service, you will be contacted using the information you enter on the site. If you agree to deploy, your information will be forwarded to the appropriate field operational officials.

Thank you for Volunteering!

WHO CAN VOLUNTEER?

FAQ'S

When PULSE is Activated

The screenshot shows a web browser window displaying the California Disaster Healthcare Volunteers (DHV) website. The browser's address bar shows the URL <https://www.healthcarevolunteers.ca.gov/web/ems.php>. The website header includes the DHV logo and the text "DISASTER HEALTHCARE VOLUNTEERS". A navigation menu contains links for Home, My Profile, Missions, Messages (1), and Organizations. The main content area is titled "Home" and features a user profile section on the left, a central "PULSE" status notification, and a "Recent Messages" section. The profile section shows a placeholder for a profile picture, the text "Your profile is: 100% Complete", and details for the user's role as an EMT (ECL3) with an active account status. The "PULSE" section displays a red banner stating "Pulse is currently ACTIVE!" with a "Log In To PULSE" button. Below this, an "Updates" section shows a message: "You don't have any updates". The "Recent Messages" section lists a message from "DHV Journal Autumn Edition" dated "9/13/2017 11:15 AM". On the right side, a "Did you know?" box provides "Help Resources" for users, including instructions on how to search for help or contact administrators. The footer of the website contains links for "Terms of Service and Privacy Policy", "FAQ", "Help", and "Contact Us". The Windows taskbar at the bottom of the screen shows various application icons and the system clock indicating 1:14 PM on 10/25/2017.

Accessing PULSE

PULSE is ACTIVE - Internet Explorer

https://healthcarevolunteers.ca.gov/.../module.php?core%2Flogin.php%2Fauth%2Fcalifornia_pulse%2Freturn%2F... California Emergency Medical Services Auth

PULSE is ACTIVE

The California Patient Unified Lookup System for Emergencies (PULSE) allows selected health care professionals, while volunteering during a disaster, the ability to search and return personal health information pertaining to patients they are treating. The PULSE improves medical care during a disaster as well as support for clinical decision-making during emergency medical situations by disaster healthcare professionals.

The underlying concept behind PULSE is that multiple health information organizations, health systems, and other data sources have been connected to allow you to use a secure, web-based portal user interface. During a disaster, the portal is active which enables disaster healthcare volunteers and other authorized professionals to access the health information of displaced patients and evacuated victims.

As a health care professional, you are authorized to use PULSE for only those patients that you are treating during an activated emergency or disaster situation. You are also required to protect the confidential personal health information of those individuals.

System use is for authorized PULSE users only. All activity on this system may be monitored, and your use of the system is consent for this monitoring. There is no expectation of privacy in your use of this system. Appropriate action will be taken in response to misuse of this system, in accordance with appropriate policy and/or local law or regulation.

This application provides secure, encrypted access to confidential patient information. Under federal HIPAA regulations, it is a criminal offense to disclose or misuse patient healthcare data. By clicking to login below, you agree to the terms and conditions for authorized use and agree to protect the personal health information for the patients you are treating. Items printed from the PULSE System are considered protected patient health information and should be treated in accordance with HIPAA regulations.

About PULSE

ONC has funded the development of the Patient Unified Lookup System for Emergencies (PULSE) to ensure vital health information can be shared and used during disasters. California Emergency Medical Services Authority (EMSA) and Audacious Inquiry (AI) developed PULSE to prepare for disasters and connect healthcare across California.

Anecdotal Benefits

- **Ambulance**
- Better Patient Information
- Save Time in completing EHR (ePCR)
- Improved billing data
- **Hospital**
- Receive accurate patient information earlier
- Estimated cost savings to UCSD of \$230,000/yr

NEXT STEPS for Disaster and EMS Interoperability

- **PULSE**

- *Expand Care Plan Exchange for Disaster response adding additional HIE/HIOs*
- *On-board to Carequality*
- *Explore PULSE use for Patient Tracking or family reunification during disasters*

- **+EMS**

- On-board additional EMS providers & Hospitals to HIO/HIEs or interoperability systems.
- Expand the number of LEMSA using the SAFR Model from 4 to 33 by September 30, 2021.
- Connect EMS providers to specialized registries relevant to emergency medical services ie End of Life Decisions (POLST) and include long term care facilities.
- Expand information available to Community Paramedics and connect with public health/social service entities.

NATIONAL
HEALTH IT
COLLABORATIVE
For the Underserved

“A Public/Private Partnership for a Healthier America”

NHIT Care Campaign: Rebuilding the Health Care Safety Net for Puerto Rico and USVI

The Establishment of NHIT

The National HIT Collaborative for the Underserved (NHIT) was established in 2008 with a mission to engage underserved populations in the development and use of health information technology (HIT) as a means to support and sustain health equity and economic viability based on NHIT’s five pillars: Workforce, Innovation, Policy, Research, and Community.

Supporting Organizations

NHIT public/private partnership launched with support from:

Department of Health and Human Services (HHS)

Office of Minority Health (OMH)

National Institutes of Health (NIH)

Health Information Management Systems Society (HIMSS)

Summit Health Institute for Research and Education (SHIRE)

+ over 100 other organizations...

Key Initiatives

Since its founding, NHIT has gone onto support the following initiatives:

HIMSS18 – Leadership Conference

CLAS Standards Dashboard

Hepatitis Awareness Initiative

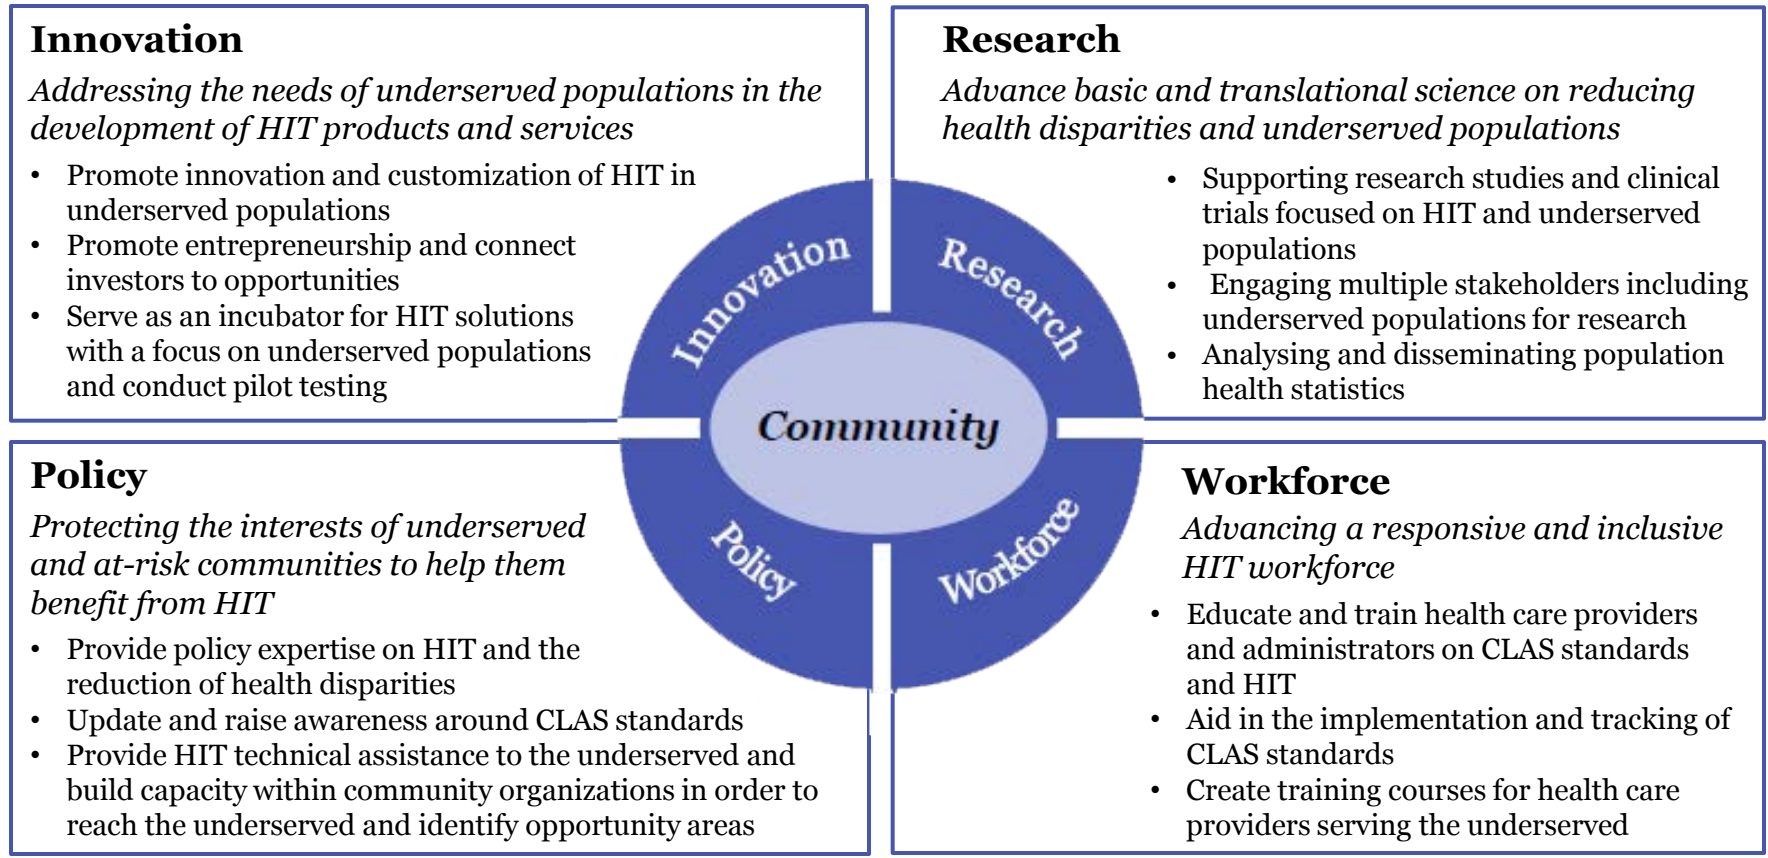

Diversity Workforce: “HIT” Diversity Workforce Development Initiative

Lifeline Roundtable

+ over half a dozen other major programs, conferences, and initiatives...

NHIT's Capabilities

NHIT brings a proven set of approaches for meaningful engagement with underserved populations in the development and use of HIT for health-related outcomes.

Preserving the Safety Net:

The NHIT Care Campaign to Restore, Rebuild and Transform the Health Care Safety Net for Puerto Rico and USVI

Authorized Use Only

A Dire Public Health Challenge

More than 450,000 Americans in Puerto Rico (PR) and the US Virgin Islands (USVI), are served by 24 Federally Qualified Health Centers (FQHCs) and approximately 100 affiliated health clinics distributed across the islands. The FQHCs provide essential primary and community care services for the most vulnerable communities, specifically those citizens who are at or below 200% of the federal poverty line. The FQHCs combined with local clinics and Individual Practice Associations (IPAs) serve 1.7 million patients, over half the total population of PR and USVI.

FQHCs in Puerto Rico and USVI

After making progress towards restoring power to more than 1 million residents in PR and USVI following Hurricane Irma on Sept. 6th, PR and USVI were struck by Hurricane Maria on Sept. 20th, causing severe, widespread damage to essential infrastructure. The National Health IT Collaborative for the Underserved (NHIT), with guidance from PricewaterhouseCoopers (PwC) and supporting partners, immediately launched the **NHIT Care Campaign to help rebuild the HIT and health care infrastructure by providing emergency medical response, healthcare supply chain, and technology-enabled care coordination** to help FQHCs and local primary care hubs for underserved communities.

Authorized Use Only

Current State of Health-Related Infrastructure

Hurricanes' Irma and Maria have caused severe, widespread damage to the infrastructure and built environment in Puerto Rico and USVI, leaving many without power, clean water, transportation, telecommunications services, and other essential resources.

Puerto Rico

U.S. Virgin Islands

Notes: East End Health Center is energized, however, both of Frederiksted Health C'sted, Inc sites are on unreliable generators. No land line phones are available in the USVI.

Authorized Use Only

NHIT Care Campaign: Key Objectives

The NHIT Care Campaign’s focus and resources are designed for allocation on priority needs for rebuilding and enhancing Puerto Rico and USVI’s HIT and health care infrastructure **aligned with current emergency response activities** for FQHC and primary care hub geographic locations. The Campaign **leverages existing federal investments for Puerto Rico and USVI** to pursue a strategic path forward, building upon current healthcare architecture and medical provider support activities in alignment with state and federal-funded initiatives. The Campaign partners respectfully request focused, impactful support from the Department of Health and Human Services (HHS) to enable:

1. Support the **establishment of a transparent public-private partnership oversight council** to help prioritize, guide, and approve activities as thoughtful stewards of federal resources;

2. **Create a future-proof, flexible health-related emergency response and recovery framework** to coordinate healthcare supply chain resource allocation while addressing critical and immediate issues such as access to reliable power, internet, clean water, and fuel supplies; and

3. **Implement leading technology-enabled care coordination in alignment with local public, private, and community stakeholders** to rebuild and extend Puerto Rico’s and the USVI’s healthcare and health data infrastructure, and scale public health reporting systems

NHIT Care Campaign: Partners

The NHIT Care Campaign has elicited a strong groundswell of support and pro bono resources from public and private sector organizations.

Leading Partners

Luis Belen, CEO
 Campaign co-lead; convening public/private stakeholders; identifying and communicating immediate and long-term needs of Puerto Rico; expertise in SDH analytics; workforce education and training

Chan Harjivan, Partner
 Campaign co-lead; Project management, convening public, private, and non-profit stakeholders for coordination of emergency response/recovery/post-recovery; HIT strategic planning; emergency supply chain management

Community Partners

Javier Jimenez, Director
 the Primary Care Association of Puerto Rico; providing key medical, technical, and humanitarian support across Puerto Rico's FQHCs and related primary care clinics

Tony Fernandez, Executive Director
 Ponce Medical School Foundation; focused on strengthening service capabilities and enhancing care coordination for Puerto Rico's healthcare practitioners.

Christensen Institute;
 reshaping society's most pressing issues through rigorous research and public outreach

UVI Caribbean Exploratory Research Center; providing research, mentoring, and training to reduce health disparities

The Emerging Technology Consortium; bridging the gap between Federal Policy and State Economic Plans to transform Urban Centers

Technical Partners

- Briljent LLC
- CH-MRC
- Health Gorilla
- Impactivo
- Williams Medical Technology (WMT)

Provider & Patient Support Partners

- Uticorp/Utinet
- Healthcare Ready
- INSPIRA
- ASPR

Resource Partners

- Amazon 
- Sprint 

Federal Advisory

- HRSA Education
- DoD NCDMPH
- ASPR USDA – WIC
- ONC CGHE
- ACF HHS

The Path Forward

Individuals and groups such as Rosana Elena Guernica, a Carnegie Mellon University student, have organized humanitarian missions to Puerto Rico, benefiting doctors and community leaders working with victims and patients.

- Raised over \$200,000
- Delivered 46,500 lbs. of medical supplies, medicine, and relief aid
- Evacuated 211 patients to FL, NY, TX, NV, CA, MN, GA, CT, and PA

What we need now

- Real-time situation awareness on the ground
- Immediate inspection and remediation of health provider sites
- Rapid connectivity to the internet to enable communication and telemedicine
- Enhancement of coordination and alignment of federal, local, commercial, and NGO efforts
- Coordination of healthcare emergency/recovery supply chain
- Scalable clinical, community, and public health reporting systems in anticipation of regional outbreaks such as Zika
- HIT needs assessment, infrastructure roadmap, and strategic plan development
- HIT infrastructure implementation for data interoperability and care coordination
