

Putting the Person at the Center: Integrating Plans for Long-Term Services and Supports and Health Care Delivery through Health Information Technology

David O'Hara, Ph.D

Joint meeting sponsored by the Office of the National
Coordinator for Health Information Technology and
the Administration for Community Living

October 16, 2014

Health Disparities and Health Literacy

- **Prevalence Type 2 Diabetes:** working age adults with cognitive limitations compared with adults with no disability - 19.4% vs 3.8%
On average also had on average 4 other chronic health conditions
- **Premature Deaths:** UK data – men with learning disabilities died 13 years sooner and women 20 years sooner than general population
- **Health Literacy:** Institute of Medicine report - nearly nine out of 10 adults have difficulty using health information to make proper health decisions

Living Well With a Disability: a Person-Centered Planning Tool for Integrating Personal Life Goals with a Health and Wellness Plan
