

We, Quantum Innovations, Inc. creator of **PWeR** (Personal Wellness *electronic* Record) share the principle that to achieve an open, connected care for our communities, we all have the responsibility to take action. To further these goals, we commit to the following principles to advance interoperability among health information systems enabling free movement of data, which are foundational to the success of delivery system reform.

1. Consumer access: To help consumers easily and securely access their electronic health information, direct it to any desired location, learn how their information can be shared and used, and be assured that this information will be effectively and safely used to benefit their health and that of their community.
2. No Blocking/Transparency: To help providers share individuals' health information for care with other providers and their patients whenever permitted by law, and not block electronic health information (defined as knowingly and unreasonably interfering with information sharing).
3. Standards: Implement federally recognized, national interoperability standards, policies, guidance, and practices for electronic health information, and adopt best practices including those related to privacy and security.

To implement these commitments, we will endeavor to use our experience in the management of patient care to connect **PWeR** to other systems, including Accountable Care Organizations (ACOs) and payers, to promote coordinated care and remove barriers. We pledge to contribute to private sector initiatives and to evolving industry standards.

Quantum Innovations, Inc.
