I am a Contributing Care Team Member

continued

I am a credible source of information…

I am a Contributing Care Team Member

continued

The data I generate is material to care…

I am a Contributing Care Team Member

continued

My goals may be episodic, chronic, or quality of life and death…

I am a Contributing Care Team Member

continued

I am an important safety checkpoint…

I am a Contributing Care Team Member

continued

I am a health data exchange of one…

I am a Contributing Care Team Member

continued

I am an important participant in shared decision making…

I am a Contributing Care Team Member

continued

The messages we share are material to my health and care

EHR Systems Action: Patient System Reaction

EHR Systems Action: Patient System Reaction

continued

Structured data advances all systems…

EHR Systems Action: Patient System Reaction

continued

Expand and harmonize standards …

EHR Systems Action: Patient System Reaction

continued

Create once use often…

EHR Systems Action: Patient System Reaction

continued

View, download and transfers should be Provider protected and patient directed…

EHR Systems Action: Patient System Reaction

continued

Orders can be directed to patients and from patients…

EHR Systems Action: Patient System Reaction

continued

Patients are the only source of adherence information…

EHR Systems Action: Patient System Reaction

continued

Data reconciliation should include the patient…

Patient Facing Systems should not be encumbered by legacy technology…

Patient System: Not Legacy, NEW

Innovation should be encouraged not limited…

Patient System: Not Legacy, NEW

continued

Transactional approaches the minimum requirements…

Patient System: Not Legacy, NEW

continued

View, download and Transmit should be fluid and connected to education …

Patient System: Not Legacy, NEW

continued

Patient generated data should be interoperable…

Patient System: Not Legacy, NEW

continued

Standards accelerated where patient generated data likely…

Patient System: Not Legacy, NEW

continued

Standards accelerated where patient generated data likely…

Patient System: Not Legacy, NEW

continued

Vocabularies should be standardized and harmonized…

Patient System: Not Legacy, NEW

continued

New design should be with the patient in mind…

How Do I Compare?…

How Do I Compare?

Proactively identify the care I should be getting…

Meaningful Use Minimum LTPAC

- Adopt current MU 1-3 as Core items in:
  - Transitions of Care
  - Interoperability
  - Patient engagement
  - Care Coordination

LTPAC Leadership

- Advanced Directives Core Requirement:
  - Record presence
  - Scan or link within record
  - PGHD
  - Reflect use
  - Reflect patient education/participation
  - Quality measure
- Certification Requirements
  - Interoperable standards
    - Query
    - Share
  - Harmonize with PGHD LCC

LTPAC Leadership

continued

- Certification Requirements
  - Interoperable standards
    - Query
    - Share
    - Quality measures
  - Harmonize with PGHD LCC

LTPAC Leadership

continued

- POLST, MOLST as Menu Item:
  - Order entry
  - Care transitions
  - Quality measures
  - Use
- Interoperable standards
  - Order entry
  - Care transitions
  - Quality measures

I am a person, not a label.
