Phase 1 Charge

- **Principal Charge for Phase 1:** Review the newly specified Data Elements proposed in the USCDI v1
- **Specific Charge:** Provide recommendations on the following:
 - » *Inclusion of Address and Phone Number Data Elements*
 - » *Inclusion of Provenance Data Elements*
 - » Inclusion of Clinical Notes Data Elements
 - » Inclusion of Pediatric Vital Signs Data Elements
 - » Missing Data Elements within Proposed Data Classes

USCDI v1

The highlighted Data Elements are those for which ONC is seeking recommendations in the Phase 1 charge.

Data Elements not highlighted are already included in the 2015 Common Clinical Data Set (CCDS).

A SET OF DATA CLASSES TO SUPPORT NATIONWIDE INTEROPERABILITY

The USCDI Version 1 (USCDI v1) is proposed as a standard (§ 170.213). It reflects the same data classes referenced by the CCDS definition and includes new required data classes and data elements, noted below.

If adopted, health IT developers will need to update their certified health IT to support the USCDI for all certification criteria affected by this change.

Patient Demographics – Data Element Recommendations

- New Patient Demographics data elements proposed by ONC for inclusion in USCDI v1:
 - » Address; Phone Number
- Task Force recommendations:
 - » Address
 - Standardize format and content of Address
 - Standards for individuals experiencing homelessness and refugees
 - » Phone Number
 - Use mobile phone number
 - » See AHIMA, USPS, Association for Healthcare Documentation Integrity, current requirements for CEHRTs
- Additional data elements proposed for discussion:
 - » Nickname; last 4 digits of SSN; personal ID (e.g., driver’s license, passports, etc.); e-mail; alternative address (e.g., work, school)

Provenance - Data Element Recommendations

- New Provenance data elements proposed by ONC for inclusion in USCDI v1 :
 - » Author; Author's Time Stamp; Author's Organization
- Task Force recommendations:
 - » Author
 - Specify a permitted “Author Type” by data type? (e.g., lab director for labs, surgeon for procedure note)
 - Does this include setting, context, location? (e.g., vital signs collected at home, pharmacy, clinic, or hospital)
 - » Chain of Trust
 - Minimum Original Author and immediate source (if different from author)
- Additional Data Elements proposed for discussion:
 - » Unique identifiers (original ID of data, supplemental ID, Medicare code, National Provider Identifier)

The United States Core Data for Interoperability Standard

We propose to replace the “Common Clinical Data Set” (CCDS) definition with the “United States Core Data for Interoperability” (USCDI) standard beginning with USCDI Version 1 (v1) in § 170.213. This will increase the minimum baseline of data classes that must be commonly available for interoperable exchange.

USCDI reflects the same data classes referenced by the CCDS definition and includes new required data classes and data elements:

Provenance

Clinical Notes

Pediatric Vital Signs

Address & Phone Number

If adopted in a final rule, health IT developers would be required to update their certified health IT to support the USCDI v1 for all certification criteria affected by this proposed change.

USCDI Standard Annual Update Schedule

ONC intends to establish and follow a predictable, transparent, and collaborative process to expand the USCDI, including providing stakeholders with the opportunity to comment on the USCDI's expansion.
