U.S. Core Data for Interoperability Task Force Recommendations to the HITAC

Christina Caraballo, Co-Chair
Terry O’Malley, Co-Chair

May 13, 2019
Task Force Phase 1 Charge

• **Principal Charge for Phase 1:** Review the newly specified Data Elements proposed in the USCDI v1

• **Specific Charge:** Provide recommendations on the following:
  
  » Inclusion of New Patient Demographics Data Elements
  
  » Inclusion of Provenance Data Elements
  
  » Inclusion of Clinical Notes Data Elements
  
  » Inclusion of Pediatric Vital Signs Data Elements
  
  » Missing Data Elements within Proposed Data Classes

USCDI Task Force Guiding Principles and Scope

• The primary focus of the Task Force (TF) in Phase 1 is to provide recommendations regarding proposed or missing Data Elements in USCDI v1.

• The TF did not consider how the proposed Data Elements could be incorporated into current or future record systems or provide recommendations regarding how that might occur.

• Unless otherwise indicated, each of the TF recommendations apply to USCDI v1.

• The TF cites different transport standards as examples; however, the recommendations are agnostic regarding transport.

• The TF assumes that all USCDI data elements will be tightly specified and semantically interoperable.
Patient Demographics: Use Cases

Patient demographics supports:

- Patient matching
- Identity verification
- Clinical care
Patient Demographics: Recommendation 1

- ONC proposed the following new Patient Demographic data elements to be included in USCDI v1:
  » Address
  » Phone Number

- Recommendation 1. Accept Address in USCDI v1 as proposed by ONC with the following additions:
  » Recommendation 1a. Include both “Current Address” and Previous Address”.
  » Recommendation 1b. Encourage the use of the USPS standardized format for “Address”.
  » Recommendation 1c. Explore the feasibility of using an international address standard.
Patient Demographics: Recommendations 2-4

- Recommendation 2. Accept Phone Number in USCDI v1 as proposed by ONC with the following additions:
  - Recommendation 2a. Include designations for both Mobile Number(s) and Landline Number(s)
  - Recommendation 2b. Include a designation indicating whether the number is that of the patient or another party. Private or shared

The USCDI TF recommends that ONC include the following data elements in USCDI v1:

- Recommendation 3. Include destination(s) for electronic communications (e.g. email addresses)
- Recommendation 4. Include contact information for the individual(s) with authority to consent to treatment and data use.
Patient Demographics: Recommendations 5-7

• Recommendation 5. Include last four digits of the Social Security Number.

• Recommendation 6. Include optional identifiers such as identification numbers issued by State or Federal government.

• Recommendation 7. Include Self-reported gender identity.
Provenance: Use Cases

Data Provenance supports:

• Establishing trust in data source
• Deduplication of data elements
• Data element versioning
Provenance: Recommendations 8-9

• ONC proposed the following new Provenance data element to be included in USCDI v1:
  » Author Organization
  » Author
  » Author’s Time Stamp

• Recommendation 8. Accept Author Organization in USCDI v1 as proposed by ONC

• Recommendation 9. Accept Author in USCDI v1 as proposed by ONC with the following additions:
  » **Recommendation 9a.** Limit use of Author to Clinical Notes and Medication Prescriptions.
  » **Recommendation 9b.** Use Author’s Organization for data classes other than Clinical Notes and Medication Prescriptions.
• Recommendation 10. Amend “Author’s Time Stamp” as proposed by ONC in for USCDI v1 to “Time Stamp”. Implement locally.

The USCDI TF recommends that ONC should consider including the following data elements in USCDI v1:

• Recommendation 11. Include a unique Organization identity if an adequate candidate is identified

• Recommendation 12. Include a designation to indicate when the patient is the author of the data
Clinical Notes: Use Cases

Clinical Notes supports:

• Improving sorting of incoming notes
• Improved communication across the care continuum
Clinical Notes: ONC Proposed Data Elements

- ONC proposed the following new Clinical Notes data elements to be included in USCDI v1:
  - Consultation Note
  - Discharge Summary Note
  - History and Physical
  - Imaging Narrative
  - Laboratory Report Narrative
  - Pathology Report Narrative
  - Procedure Note
  - Progress Note
Clinical Notes: Recommendations 13-16

• **Recommendation 13.** Accept the following Clinical Notes in USCDI v1 as proposed by ONC
  » Consultation Note
  » Discharge Summary Note
  » History and Physical
  » Procedure Note
  » Progress Note

• **Recommendation 14.** Amend “Imaging Narrative” as proposed by ONC in USCDI v1 to “Diagnostic Imaging Report”.

• **Recommendation 15.** Omit the Laboratory Report Narrative as proposed by ONC in USCDI v1. We believe this note is duplicative of the Laboratory Results data class.

• **Recommendation 16.** Omit the Pathology Report Narrative as proposed by ONC in USCDI v1. We believe this note is duplicative of the Pathology Report data class.
Clinical Notes: Recommendations 17-22

The USCDI TF recommends that ONC include the following data elements in Clinical Notes USCDI v1:

- **Recommendation 17. Include a Continuity of Care Document.**
- **Recommendation 18. Include an Operative Note.**
- **Recommendation 19. Include Miscellaneous Note in USCDI v1**
- **Recommendation 20. Include Transfer Summary Note as optional in USCDI v1.**
- **Recommendation 21. Include Advance Care Planning Note as optional in USCDI v1**
- **Recommendation 22. Add Care Plan Note as optional in USCDI v1**
Clinical Notes: Recommendations 23-24

The USCDI TF recommends including the following Clinical Notes in future iterations of USCDI:

- Recommendation 23. include Referral Note
- Recommendation 24. Include Long Term Services and Supports Care Plan Note.
Pediatric Vital Signs: Use Cases

Pediatric Vital Signs support:

» Exchange of vital sign measurements

» Exchange of calculated values derived from vital sign measurements
ONC proposed the following new Pediatric Vital Signs data elements to be included in USCDI v1:

- BMI percentile per age and sex for youth 2-20,
- Weight for length percentile for age and sex for youth 2-20
- Occipitofrontal circumference under 3 years old

Recommendation 25. Accept BMI percentile per age and sex for youth 2-20 in USCDI v1 as proposed by ONC with the following additions:

- **Recommendation 25a.** Require this data element if the IT system already stores it. Require that weight, age and sex are shared for all patients so recipient systems can perform their own calculations.
- **Recommendation 25b.** Require the storage of this data element regardless of format whenever provided to the patient/guardian.
Pediatric Vital Signs: Recommendations 26-27

- Recommendation 26. Accept Weight for age per length and sex in USCDI v1 as proposed by ONC with the following additions:
  - **Recommendation 26a.** Amend data element to “Weight for length percentile by age and sex for youth 2-20”.
  - **Recommendation 26b.** Require this data element if the IT system already stores it. Require that weight, age and sex are shared for all patients so recipient systems can perform their own calculations
  - **Recommendation 26c.** Require the storage of this data element regardless of format whenever provided to the patient/guardian

- Recommendation 27. Accept Occipitofrontal circumference under 3 years old in USCDI v1 as proposed by ONC
Missing Data Elements: Recommendations 28-30

- Recommendation 28. Add provider demographic data elements to the Care Team Members Data Class in USCDI v1
  - Recommendation 28a. Include Name
  - Recommendation 28b. Include Contact information
  - Recommendation 28c. Include Identifier (e.g., NPI, certification, state license)

- Recommendation 29. Add Indication and/or associated diagnosis for each medication in USCDI v1 Medications Data Class

- Recommendation 30. Include a designation and address entry standard for individuals experiencing homelessness, including displaced persons and refugees
Additional Issues: Recommendations 31-32

- Recommendation 31. Begin the process to develop a Quality Measures Data Class
- Recommendation 32. Begin the process to assign a unique and persistent identity for each Data Element and develop a governance structure to oversee its use.
Appendix
The Office of the National Coordinator for Health Information Technology

The USCDI Version 1 (USCDI v1) is proposed as a standard (§ 170.213). It reflects the same data classes referenced by the CCDS definition and includes new required data classes and data elements, noted below.
