- **Public Comment**
ISP Task Force Charge

- **Overarching Charge**: To make recommendations on priority uses of health information technology and the associated standards and implementation specifications that support such uses.

- **Specific Charge**: The ISP Task Force will:
  1. Make recommendations on the following:
     - Priority uses of health IT (consistent with the Cures Act’s identified priorities);
     - The standards and implementation specifications that best support or may need to be developed for each identified priority; and
     - Subsequent steps for industry and government action.
  2. Publish a report summarizing its findings.
## List of Task Force Members
