2018: A Monumental Year of Service

In 2018, CoverMyMeds processed a record number of PA requests — **41.7 million total** — saving time for providers and patients.

- **10.4 million hours** saved by providers in preventing phone calls and faxes
- **118.6 million days** saved in time to therapy for patients by completing PA requests at the point of prescribing
- **$343.4 million** saved by providers' offices by keeping staff off phones and fax machines

Real-Time Benefit Check (RTBC)

2018 Real-Time Benefit Check National Adoption Scorecard
A Lack Of Price Transparency

At the point of prescribing, formulary and benefit (F&B) coverage information, patient assistance, pharmacy cost and cash price options — among other cost-contributing factors — are rarely available.

Providers who currently have access to formulary and benefit information in their EHR have an average trust rating of only 5.7/10.¹

¹ CoverMyMeds Provider Survey, 2018
Prescribers Talk About Medication Cost

SURVEY QUESTION: How often do you have a conversation with your patient about if they can afford the medication you plan to prescribe?

70% of prescribers indicated they frequently or always converse with their patient about whether they can afford the medication they plan to prescribe.
National Patient Survey Data

CoverMyMeds conducted a national survey to both patients and providers to see how we can help avoid prescription barriers even further.

**SURVEY QUESTION:**

Have you ever received a prescription that cost more than you expected?

75% of patients report that they’ve received a prescription that cost more than they expected.

**SURVEY QUESTION:**

Have you ever not filled a medication because it was too expensive?

52% of patients surveyed said that they did not fill a prescription because it cost too much.
Empowering providers and patients to make decisions about their medication therapy before finalizing the prescription.
Introducing RxBenefit Clarity

Delivering True Price Transparency at the Point-of-Prescribing

• Determines accurate patient pay amount at the patient’s preferred pharmacy and whether PA is required
• Provides real-time, focused insights via the physician workflow
• Eliminates various prescribing barriers that may lead to callbacks from the pharmacy and restocking
• Helps improve physician and patient satisfaction

Sample Responses:
• $20 Patient Pay Amount
• Product Not Covered
• PA Required. Submit Prospective PA

How RxBenefit Clarity Works

**EHR**
- Initiates Request transaction
- Includes:
  - Pharmacy Benefit Information
  - Drug
  - Patient Pharmacy
- Displays Response from CoverMyMeds

**Benefit Processor**
- Processes request and sends response
  - Generic programs
  - Pharmacy Substitution
  - Patient Assistance
  - Alternatives

**PBM API**
- Processes request and sends response
  - Mail Order
  - Alternatives

**CoverMyMeds**
- Receives EHR request
- Sends request to PBM API or RelayHealth if no direct payer connection exists
- Captures response from PBM or RelayHealth
- Sends response to EHR
- Formats request data for obtaining benefit response from payer or historical claims

Case Study for RxBenefit Clarity

CoverMyMeds partnered with a leading EHR system with over 150,000 providers to launch RxBenefit Clarity. Since then, RxBC has been used by providers to generate over 130 million individual searches.

- Patient pay amount returned was 97% accurate, increasing providers’ confidence when speaking with patient about costs.
- Patients whose providers used RxBenefit Clarity were 19% more adherent to picking up their medications.
- Cheaper alternatives were shown in 2.5 million transactions, helping providers give more options to their patients.
- Same day pick-up was available for 84% of the transactions generated; 61% percent were available within one hour, decreasing time to therapy.
- Providers ran an average of 4 transactions during a single patient visit, showing active decision support that allows providers and patients to make decisions with confidence across the full spectrum of prescriptions.
