Health IT Infrastructure Landscape Analysis

• The 21st Century Cures Act requires an annual assessment of the health information technology infrastructure, nationally and locally, that allows for the electronic access, exchange, and use of health information.

• This landscape analysis covers key topics in each of the four target areas, as well as federal activities across the target areas.

• Additional topics are covered in the landscape analysis for awareness.
Health IT Infrastructure Gap Analysis

• The 21st Century Cures Act requires an analysis identifying existing gaps in policies and resources for achieving the ONC FY19-20 objectives and benchmarks and furthering interoperability throughout the health information technology infrastructure.
Recommendations for Addressing Gaps

• The 21st Century Cures Act requires an analysis identifying opportunities and recommendations for HITAC activities to address the health information technology infrastructure gaps identified.

• Tiered Approach to Key Opportunities
  • Immediate Opportunity
    • Correlates to planned topics for HITAC consideration within the next one to two years, i.e., calendar years 2021-22
  • Longer-Term Opportunity
    • Potential HITAC consideration anticipated to begin in three or more years, i.e., calendar year 2023 or later
