

ISP Task Force Meeting

Arien Malec, Co-Chair David McCallie, Co-Chair

March 18, 2021

Health Information Technology Advisory Committee The Office of the National Coordinator for Health Information Technology

Meeting Agenda

- Introductions
- Review of Mandate
- Review of ideas from 11 March meeting
- Framework and Prioritization Discussion
- Solicit Additional Ideas
- ISP TF Timeline/ISA Reference Cycle
- Public Comment
- Meeting Adjourn

Task Force Roster

Name	Organization		
Arien Malec (Co-Chair)	Change Healthcare		
David McCallie (Co-Chair)	Individual		
Ricky Bloomfield	Apple		
Cynthia Fisher	PatientRightsAdvocate.org		
Valerie Grey	New York eHealth Collaborative		
Jim Jirjis	HCA Healthcare		
Edward Juhn	Blue Shield of California		
Ken Kawamoto	University of Utah Health		
Victor Lee	Clinical Architecture		

Name	Organization		
Leslie Lenert	Medical University of South Carolina		
Clem McDonald	National Library of Medicine		
Ming Jack Po	Ansible Health		
Raj Ratwani	MedStar Health		
Ram Sriram	National Institute of Standards and Technology		
Sasha TerMaat	Epic		
Andrew Truscott	Accenture		
Scott Weingarten	Cedars-Sinai and Stanson Health		

Mandate: Identify Priority Uses of Health IT

21st Century Cures Act

"The National Coordinator shall periodically convene the HIT Advisory Committee to identify priority uses of health information technology...identify existing standards and implementation specifications that support the use and exchange of electronic health information needed to meet the priorities...publish a report summarizing the findings of the analysis...and make appropriate recommendations..."

"The HIT Advisory Committee, in collaboration with the National Institute for Standards and Technology, shall annually and through the use of public input, review and publish priorities for the use of health information technology, standards, and implementation specifications to support those priorities."

O GANGARIAN OO HARANIAN OO HARANIAN OO HARANIAN OO HARANIAN SERVICES CO.

Review ideas from 11 March ISPTF call (plus a few suggested afterwards)

- 1. Improving syndromic surveillance
- 2. Improving situational awareness for Public Health (PH) emergencies
- 3. Address gaps in vaccine reporting data flow
- 4. Health Equity issues
- 5. Better usage of EHR data for PH and other purposes
- 6. Gaps in Adverse Event (AE) reporting
- 7. Contact and exposure tracking
- 8. Care plans and chronic disease burden
- 9. Better / easier binding between persons and their digital devices
- 10. Better integration of clinical and administrative data
- 11. Improve data sharing across VA/DoD and non-governmental systems
- 12. (Vaccination "passports" ONC is already driving this use-case)

Improving syndromic surveillance

- Address issues of siloed data, especially around disconnected lab data
- Address gaps in roll-up of data to state and local aggregators (HIE, PH)
- Excessive variability of lab messages
- Early detection and reporting of novel variants
- Revisit eCR (?)
- Revisit CMS decision to drop quality measure for lab reporting (incentive)

Improving situational awareness for PH emergencies

- State-by-state variations in required reporting (over and above CDC minimums)
- Non-computable "standards" for the required reporting (PDF, text)
- Private third-party collections caused confusion
- Review the proposed SANER standard
- Is there a role for TEFCA entities?

Address gaps in vaccine reporting data flow

- (Data flow from EHR inbound to local PH ISS is already pretty good?)
- Flows outbound from PH/ISS are lacking
 - Flows to local HIE and/or TEFCA entities
 - Reporting involving groups of people (e.g., IZ status by zip code or region)
 - Consider new simpler standards including "flat FHIR"
 - Push or pull or both?
- Flows from non-standard IZ locations (pharmacy) may be missing
- Flows from mass-immunization events may be missing
 - How does vaccine administer know where to send the IZ message?

Health Equity issues

- SDOH and Health Equity data standards
 - Are they adequate?
 - Which ones should be pushed?
- HL7 "Gravity" project learn more?
- Why is sensitive race/ethnicity/gender data so often not being captured?
 - Cultural issues
 - Training issues
- Access to critical data for disadvantaged/homeless/digital-divide persons
 - Phone vs browser vs smartphone as the minimum?
- Delegated (proxy) access for disabled persons

Better usage of EHR data for PH and other purposes

- Consider priority use-cases for newly required "bulk FHIR" APIs
- On-demand rapid extraction of EHR data for hypothesis generation
 - OMOP / OHSDI work with HL7? (https://www.ohdsi.org/ohdsi-hl7-collaboration/)
 - (aggregated vs. distributed query debate)
- Automated extraction of RWE, particularly post-vaccination
- Patient-reported outcome capture and aggregation
- Better support for virtual clinical trials

Gaps in Adverse Event (AE) reporting

- VAERS has an online form + paper, but no electronic standard to transmit AE experience reports from EHRs
- Multiple "profiles" for AE reporting (vaccine, biologic, drug, med device)
- FAERS is an SGML + AS2 reporting format that uses MEDDRA terminology and is oriented for clinical trials but not for clinical submission from EHRs (SNOMED, LOINC)

Contact and exposure tracking

- Improve outbound lab-reported demographics, as per Duke/Margolis recommendations
- What can we learn from Apple/Google/EU experiments in smartphone-enabled exposure tracking?
- What can we learn from NBA and NFL "bubble" tracking?

Care plans and chronic disease burden

- Pick up issues from 2019 discussion?
- New (emerging) FHIR models for plan-of-care

Better / easier binding between persons and their digital devices

- UDI
- Multi-user devices

Better integration of clinical and administrative data

- "Fast FHIR"
- DaVinci
- ePA

Improve data sharing across VA/DoD and nongovernmental systems

- Security requirements mismatch makes seamless data flow much harder
- Direct experience?

Prioritization & Recommendation Framework

Proposed Framework for Prioritization

- Assume we have more areas that want to get done than we, ONC and Industry have time, energy and focus to address.
- When prioritizing prefer:
 - Areas that align with ONC declared priority areas
 - COVID-19
 - Health equity
 - 21 Century CURES enablement
 - Unmet needs on the existing ONC Roadmap
 - Avoid areas already being covered through existing ONC initiatives
 - Foundational and/or leveraged areas (solutions that unlock other areas) over
 - General areas over specific solutions
 - Existence of well-defined policy levers over novel policy levers required
 - Areas with where jobs are already being done inefficiently over areas we want the health system to focus on

Proposed Framework for Recommendations

- Consider timeframe of recommendations
 - Near term (months) work can be done immediately
 - Medium term (6m-2 years) work requires planning and coordination
 - Long term (2-5 years) work requires standards development, piloting, legislative action, etc.
- Consider type of action required
 - ONC/industry alignment and voluntary action around existing standards
 - ONC/industry/SDO alignment and standards development
 - Incentive alignment
 - ONC and other HHS rulemaking
 - Congressional action/appropriation
 - Multistate action

ONC Interoperability Standards Advisory (ISA): Annual Reference Edition Cycle

Fall

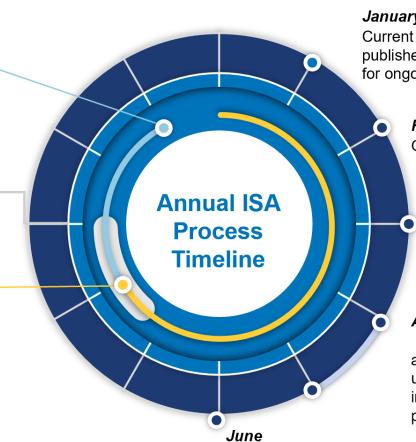

ONC and HHS staff review public comments received and HITAC recommendations, make site updates and prepare the following year's Reference Edition for publication by early January

Late Summer/Early Fall

Annual Review and Comment Period opens for sixty days - site changes are on hold so all reviewers are seeing the same content.

Winter/Spring/Summer

Changes may be made to the webversion of the ISA throughout the year (including changes considering HITAC recommendations), while the ISA Reference Edition remains static.

January

Current Year Reference Edition is published, web version of ISA is available for ongoing review and comments.

February

ONC charges HITAC to convene ISP Task Force

March

ISP Task Force reviews ISA and identifies opportunities to update "Interoperability Needs" within the ISA sections to address HITAC priority uses of health IT

April/May

ISP Task Force develops draft recommendations to add/modify any "Interoperability Needs" for considerations in updates to the ISA, including related standards implementation specifications. ISP Task Force considers public feedback in developing recommendations.

ISP Task Force submits final recommendations to the HITAC for approval. HITAC reviews, approves, and submits recommendations to the National Coordinator.

Public Comment

To make a comment please call:

Dial: 1-877-407-7192

(Once connected, press "*1" to speak)

All public comments will be limited to three minutes.

You may enter a comment in the "Public Comment" field below this presentation.

Or, email your public comment to onc-hitac@accelsolutionsllc.com.

Written comments will not be read at this time, but they will be delivered to members of the Task Force and made part of the Public Record.
