Additional Potential Topics for HITAC Discussion in 2022

HITAC Feedback

• Improving Interoperability of Lab Order and Lab Result Data

• Intersection of Clinical and Administrative Data (ICAD) (e.g. ePrior Authorization)

• Bidirectional Exchange for Public Health: Datasets and Standards, HIEs and HINs

• SDOH Data: Standards Development, Standardized Data Across Agency Programs, Barriers to Exchange
  • Better define SDOH data and ensure interoperability between SDOH data and patient records

• EHRs and Patient Safety

• Data Standards and Exchange to Support Behavioral Health, Mental Health, and Substance Abuse Disorders

• FHIR Standards Advancements
  • Consider patient-generated health data and the ability to make that data available by looking at FHIR Write Access to the EHR or View Access from the EHR (out to another app)

• Industry Interoperability Measurement Opportunities
Additional Potential Topics for HITAC Discussion in 2022 (Cont’d)

HITAC Feedback

• International Exchange, e.g. International Patient Summary; Global Master Standards Guide

• Ways to Advance the Care Continuum with Health IT
  • Closed Loop Referrals

• Patient Access and Data Sharing
  • Explore how patients share data electronically from their devices to their EHR

• Privacy and Security
  • Patient Identity/Universal Patient Identifier

• Intersection of Research and Health IT
  • Data infrastructure and health information sharing to support research

• Information Sharing under ONC Cures Act Final Rule - Supporting Industry Transition from USCDI to Full Scope of EHI Definition
