Principles

Consumer-directed privacy and per-referral consent

Equal access to an inclusive and holistic network of programs

Government partnership through capacity-building, standards and interoperability certification, and innovation demonstrations

Information Sharing & Privacy

Protecting the Seeker's Privacy

We all have tough moments in life. Whether it's struggling with addiction, unemployment, or just a series of bad events.

1. Self-navigation referrals are private to the Seeker and the community organization

1. The Seeker is in control of who else gets to see that private referral

1. The Seeker can share or remove access over time to that private referral

STATE OF NEW HAMPSHIRE

In the Year of Our Lord Two Thousand Twenty Two

AN ACT relative to a closed loop referral system in the department of health and human services.

Be it Enacted by the Senate and House of Representatives in General Court convened:

1 New Paragraph; Department of Health and Human Services; Closed Loop Referral System. Amend RSA 126-A:4 by inserting after paragraph V the following new paragraph:

VI. If the department itself or through a contracted entity provides a closed loop referral system, the following privacy and security provisions shall be included:

(a) The department shall not access any individual's personally identifiable information or protected health information from or through any closed loop referral system unless the individual is currently receiving services funded through a department of health and human services program or has received services funded through a department of health and human services program within the past 12 months, has previously given consent for the department to access their personally identifiable information or protected health information and has not revoked consent.

(b) Notwithstanding the foregoing, the department may obtain specific consent from an individual to access the individual's personally identifiable information or protected health information on each consent for a referral for services, provided that in obtaining consent:

(1) A separate page, in hard copy or electronically, shall be used; and

(2) The request shall be phrased as follows: "Do you consent to allow the New Hampshire department of health and human services to have access to your personally identifiable information and your private health information along with information about your referrals for services? Please note that you will receive the same services whether you sign this form or not."

(c) Within 48 hours of becoming aware of a data breach, the contracted entity providing a closed loop referral system shall begin the process of notification by first class mail or other individually agreed to communication mechanisms to all individuals impacted by the data breach.

(d)(1) An individual's personally identifiable information or protected health information may be added to the closed loop referral system only if:

(A) The individual consents to its inclusion on each instance of a referral for services, and

(B) The individual whose information is intended to be included in the closed loop referral system shall retain the right to opt into the system on each referral and retain the right to revoke consent to be in the system at any time.
(2) If an individual revokes consent to be in the system, then, to the extent allowed under federal or state law, information relative to the individual's referrals for services shall be deleted from the system within 7 days of the revocation.

(e) No provider or organization utilizing the closed loop referral system network shall have access to an individual's personally identifiable information or protected health information unless the individual has been referred to that provider or organization for services and the provider or organization requested consent from and was given consent by the individual to access such information.

Paying for Social Care Services

MassHealth is reimbursing community organizations for housing and food-related services. ACOs in the state are using findhelp to send these reimbursable "orders" to nonprofits. Findhelp then provides reporting that supports invoicing between nonprofits and ACOs, as well as reporting up to the State.

Health IT Policy Committee

Findings

Health IT Policy Committee
A Public Advisory Body on Health Information Technology
to the National Coordinator for Health IT

1. Community organizations are integral partners to advanced health models and are highly motivated to share data, but sharing across clinical settings and social services is not standardized and poorly incentivized.

2. Advanced health models are making substantial progress by making existing data actionable in new ways, but stakeholders also need seamless access to analytics capabilities to make this data useful.

3. Some advanced health models are responding to interoperability challenges by granting community organizations with access to a single platform, rather than realizing true interoperability across different systems.

8

Exclusivity forced on CBOs?

Actual clause in CBO contract

h. *Exclusivity*. Contractor will not enter into any arrangement, agreement or contract to provide services to other providers of social determinants of health software, including but not limited to findhelp PBC, Healthify, Inc. and NowPow, during the Term.

Summary

At some point in our lives, everyone is a Seeker.

- Giving up our privacy should not be required to get help

- Having healthcare coverage or insurance should not be required to get help

- Government should provide guidance on the importance of key principles in the use of federal funding for state and federal RFPs
