GENERAL PERSPECTIVE FROM HL7 WORK GROUP
# Public Health Work Group

## Core Specifications
- Electronic Case Reporting (CDA and FHIR)
- Syndromic Surveillance (v2)
- Cancer Reporting (CDA)
- Healthcare Surveys (CDA and FHIR)
- Healthcare Associated Infections (CDA and FHIR)
- Laboratory Orders and Results (v2 with Orders and Observations)

## Other Areas
- Congenital Heart Defects (v2)
- Early Hearing Screening (v2)
- Diagnostic Audiology (v2)
- Birth Defect Reporting (CDA and FHIR)
- Maternal and Infant Health (FHIR)
- Birth and Fetal Death (FHIR)
- Death Reporting (FHIR)

## Other Areas
- Occupational Data (v2, CDA and FHIR)
- Situational Awareness (FHIR)
- Electronic Referrals (FHIR)
- Common Profiles (FHIR)
- Immunizations (v2 and FHIR)
OUTCOMES

WHAT WORKS

HL7 consensus process creates standards
Inclusion of standards in 170.315 (f) drives adoption of standards by HIT vendors
Naming of standards in programs such as Promoting Interoperability drives implementation

CONTINUE TO RAISE THE BAR

Standards are ready to incorporate into requirements
Maternal and Child Health – screening, birth defects, birth certification
Be as exact as possible
Adopt the right technology and architecture given existing standards and infrastructure
Focus on ways to augment the data that is flowing today
Reflect public health needs in USCDI and promote USCDI+
Coordinate activities across agencies
Coordinate support across all of healthcare providers, public health and community organizations
THANK YOU
