

# John Moehrke – GE Healthcare

- API: http/REST/FHIR vs historic HL7/DICOM/IHE/XDS/web
- Shared responsibility -- Wide variation of Provider Org Maturity
  - Trust relationship building, Roles and Responsibilities
  - Incident Reporting and Response
- Technologies Supporting Trust
  - Patient Identity – cross-reference and LoA
  - User Identity and Authentication (OpenID Connect, OAuth, SAML) – special hard case is Patient as User
  - Audit Log infrastructure and management
  - App Certification and Registration management
- Certification needed to support trust
