

Certified Technology Comparison Task Force

Steven G Wilkinson, PT, PhD

- ▶ Thank you for the opportunity
- ▶ My story

What was lacking in your ability to identify whether the products supported your specialty needs?

Compliance tools including (list is not exhaustive):

- ▶ Functional Limitation Reporting capability including tracking and alerting of 1st, ≤ 10 visit, and last visit
- ▶ Tracking, computing and alerting of Medicare Cap costs (combined speech/physical therapies)
- ▶ KX modifiers for patients that have exceeded the Medicare Cap
- ▶ Tracking, reporting and alerting of physician signatures on plans of care
- ▶ Charge capture at point of care with inclusion of Medicare's 8-minute rule for accurate billing and compliance

What are the factors you would entertain to accomplish making a change?

Value for therapists:

- ▶ Structured data to be able to perform analysis, reporting/dashboards, and outcomes
- ▶ Clinical decision support
- ▶ Intuitive interfaces that match therapists' workflows/Efficiencies
- ▶ Physical therapy content (out of the box)
- ▶ Easy customization/optimization
- ▶ True interoperability with therapy-centric EMRs if the big vendor systems do not include what is listed above

What resources would be necessary?

Incentives

- ▶ We have low profit margins much lower than physicians, and hospitals
- ▶ We are not Eligible Providers...why not? (Why are chiropractors on the list and physical therapists are not?)
- ▶ Since we are not Eligible Providers we do not receive incentives
