

ONC Health IT Playbook

HITPC/HITSC Joint Committee Meeting

October 5, 2016

<https://www.healthit.gov/playbook/>

Overview

The Health IT Playbook provides practical technical and workflow assistance that includes helpful tools and resources that providers and practices can leverage when implementing and optimizing health IT.

Overview, continued

- An online, dynamic and interactive playbook of provider-level tools and resources with feedback features
- Hosted on HealthIt.gov and includes other helpful federal resources
- The Playbook was released in two phases:
 - » Phase I – Patient Engagement Playbook (Released June 2, 2016)
 - » Phase II – Overall Comprehensive Playbook (Released September 26, 2016)

Audience

- Available to the public
- Care teams in small and medium ambulatory practices, particularly those serving in Community Health Centers, HPSAs or underserved areas
- Providers who have not adopted or not using certified Health IT
- Primary Care Providers, Specialists, PAs, NPs, RNs, LTPAC and Rural Providers

Objectives

- Maintain an evolving framework of tools and resources
- Identify and share leading practices and success stories across various phases of health IT implementation
- Help to resolve key issues and challenges providers are experiencing as it relates to health IT optimization and workflow

Playbook Resources

- Current resources developed from the Health IT Regional Extension Center Program and other ONC programs
- Mix of resources (templates, videos, infographics, how-to's, use-case scenarios, etc.)
- Links to supplemental information
- Tools and Resources
 - » “Best of the best”
 - » Timely, appropriate and relevant

Playbook Topic Areas
