Health IT Policy Committee Meeting

January 13, 2015

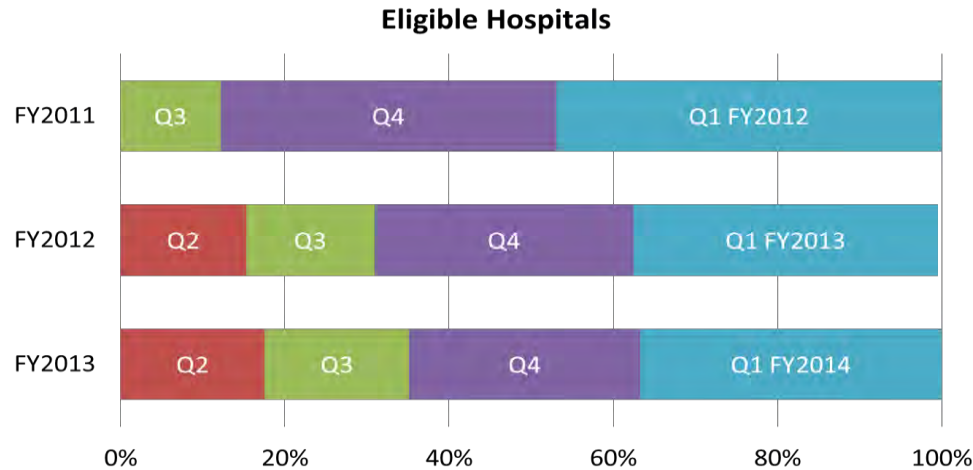

HealthIT.gov

- Describe eligible hospital attestation patterns
- Define stage 2 eligible providers
- Describe preliminary stage 2 attestation patterns

Attestation trends

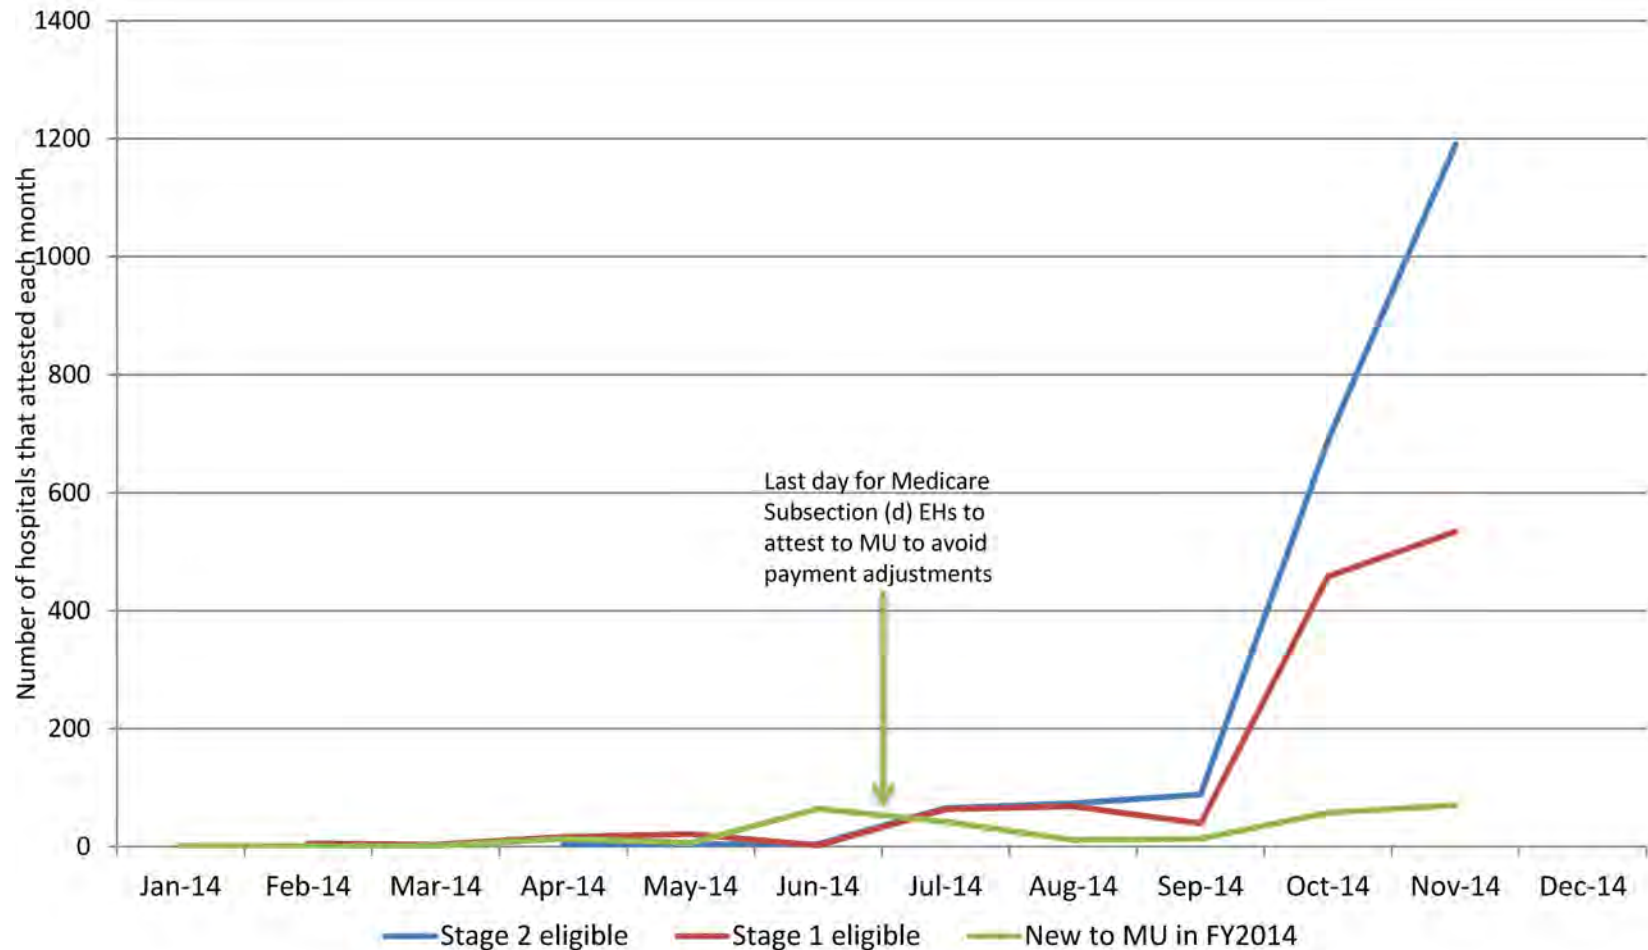

Historically, many eligible providers did not attest until after the close of the fiscal (hospitals) or calendar (professionals) year

First-time meaningful use attestations by the quarter the attestation was submitted

Eligible hospital FY2014 attestations followed historical trends

FY2014 eligible hospital attestations by attestation month

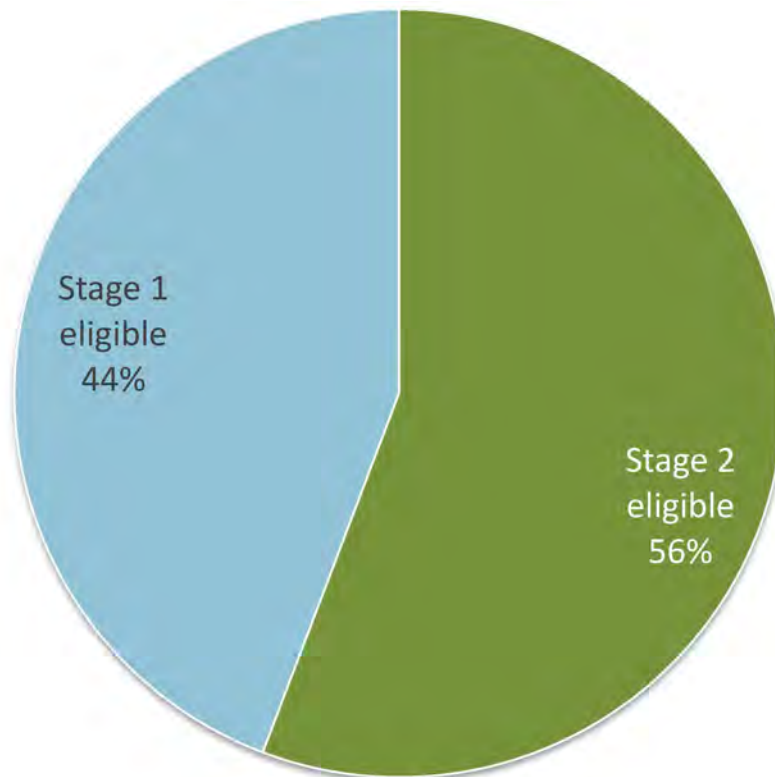

N=3,592. CMS EHR Incentive Program data through November 30, 2014. Hospitals have until December 31, 2014, to attest to FY2014 Meaningful Use activity.

Stage 2 attestations

Not all eligible providers are able to attest to stage 2 in 2014

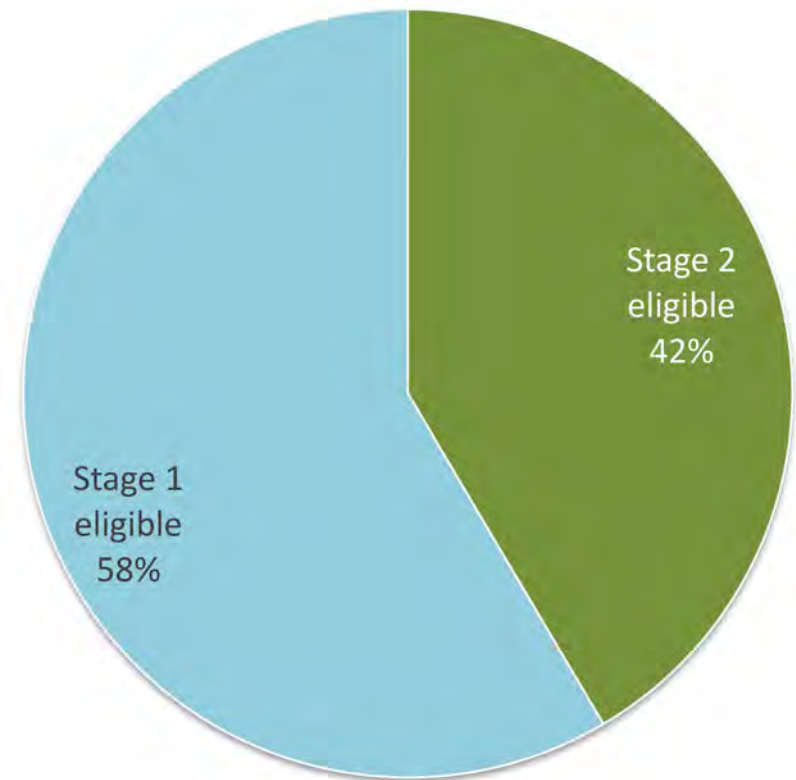

Proportion of eligible providers by meaningful use eligibility stage

Eligible Hospitals and CAHs

N=4,993

Eligible Professionals

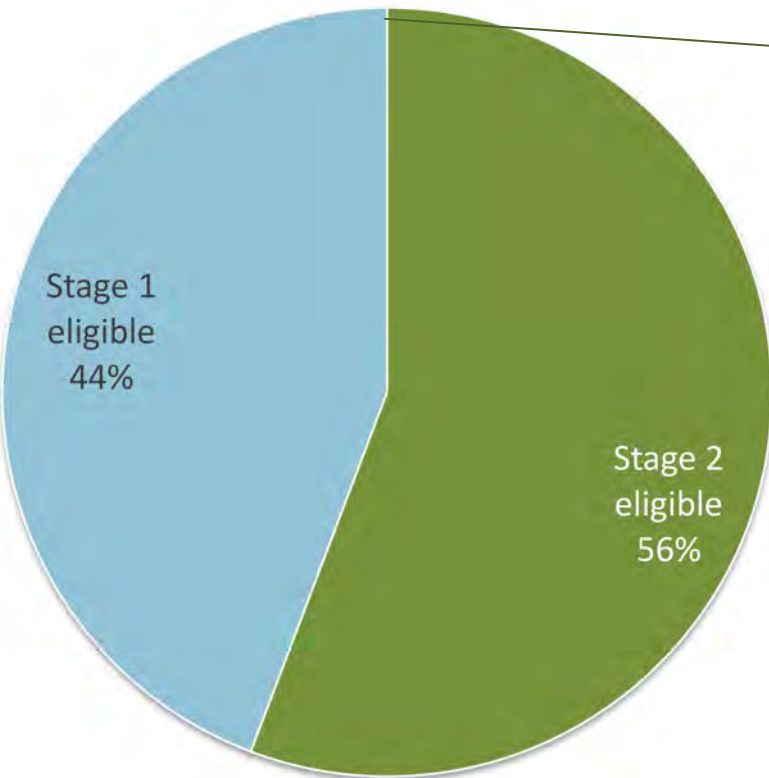

N=537,600

Only eligible providers who have completed two years of stage 1 meaningful use (i.e. those that first attested in 2011 or 2012), are eligible to attest to stage 2 in 2014.

With one month remaining to attest, almost 8 in 10 stage 2-eligible hospitals have attested

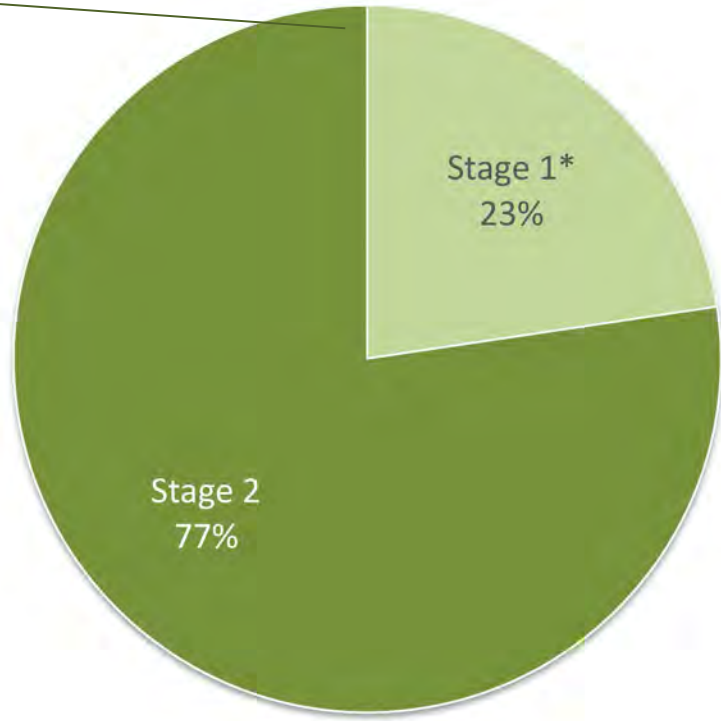

Eligible Hospitals and CAHs

N=4,993

Stage 2-eligible hospital attestations through November 2014

Hospitals had through December 2014 to attest

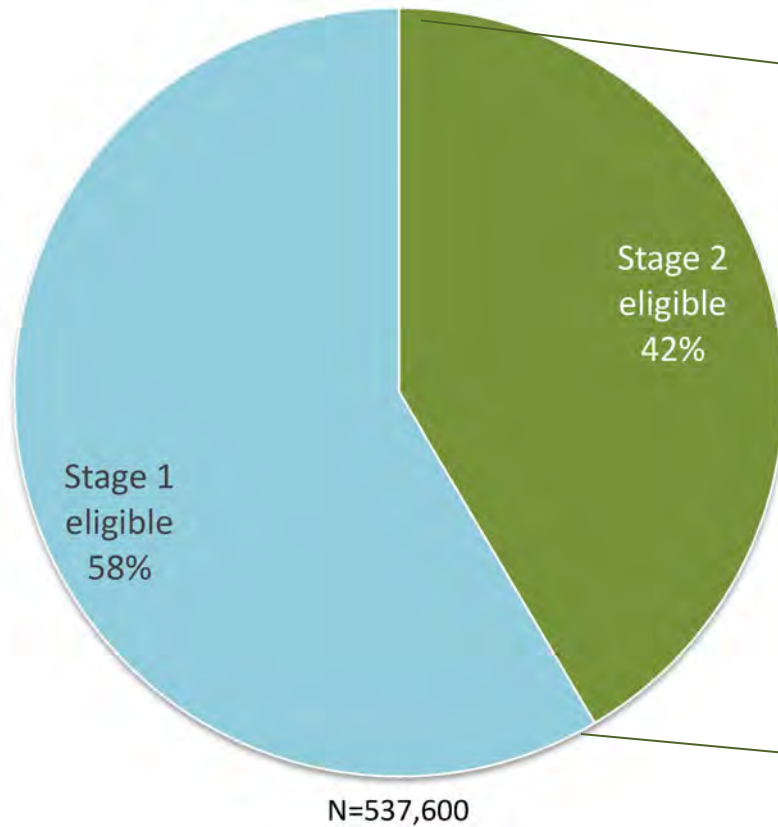

N=2,115

*Stage 2-eligible hospitals that attested to stage 1 meaningful use took advantage of the Flexibility Rule options. Among stage 2-eligible hospitals that attested to stage 1, 65% attested using 2014 certified EHR technology; 13% used a combination of 2011 and 2014 certified EHR technology; 23% used 2011 certified EHR technology.

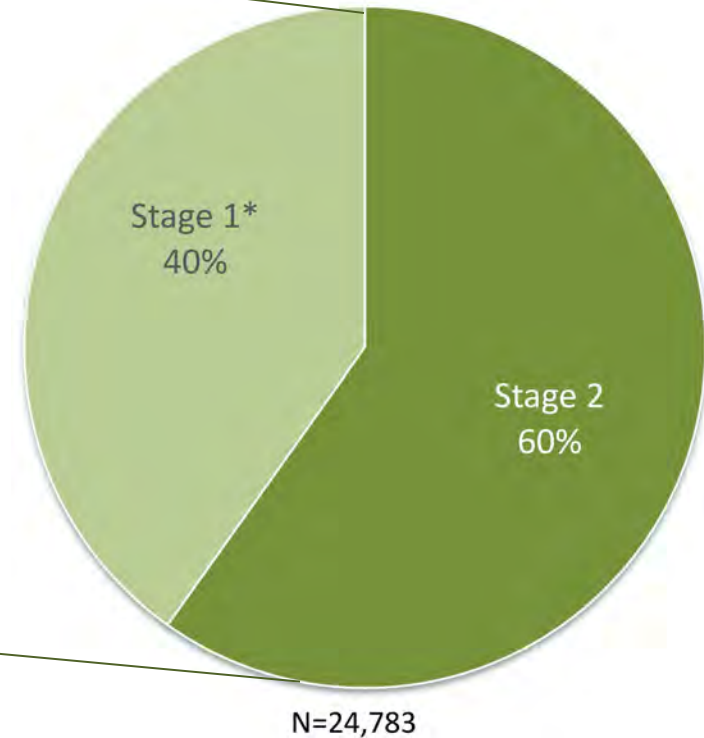

Preliminary stage 2-eligible professional attestations, with 3 months remaining for EPs to attest

Eligible Professionals

Stage 2-eligible professional attestations through November 2014

EPs have through February, 2015, to attest

*Stage 2-eligible EPs that attested to stage 1 meaningful use took advantage of the Flexibility Rule options. Among stage 2-eligible EPs that attested to stage 1, 25% attested using 2014 certified EHR technology; 7% used a combination of 2011 and 2014 certified EHR technology; 68% used 2011 certified EHR technology.

Summary

- Historically, eligible hospitals and professionals attest after their reporting year closes
 - Most hospitals attested after FY2014 closed
 - Eligible professionals have until February 2015 to attest
- Not all EPs and EHs are eligible for stage 2
 - 56% of EHs are eligible
 - 42% of EPs are eligible
- Among providers eligible for stage 2 in 2014:
 - More than 8 in 10 hospitals have attested; among those, 77% attested to stage 2
 - 13% of professionals have attested; of those, almost 6 in 10 attested to stage 2
