

# Health IT Standards Committee

A Public Advisory Body on Health Information Technology to the National Coordinator for Health IT

## Health IT Standards Committee

### Standards and Technology Updates

Steven Posnack  
Director, Office of Standards and Technology  
December 10, 2014

- Initial Task Forces
- Certification Program Open Test Method Pilot
  - Goal & Process
  - Findings

1. ***S&I Framework*** - In what ways can ONC evolve the S&I Framework to support current industry needs and those anticipated by the 3, 6, and 10-year milestones included in the interoperability roadmap?
  
2. ***Data Provenance*** - Given the community-developed S&I Data Provenance use case, what first step in the area of data provenance standardization would be the most broadly applicable and immediately useful to the industry?
  - Final Recommendations: January 27 – HITSC Meeting

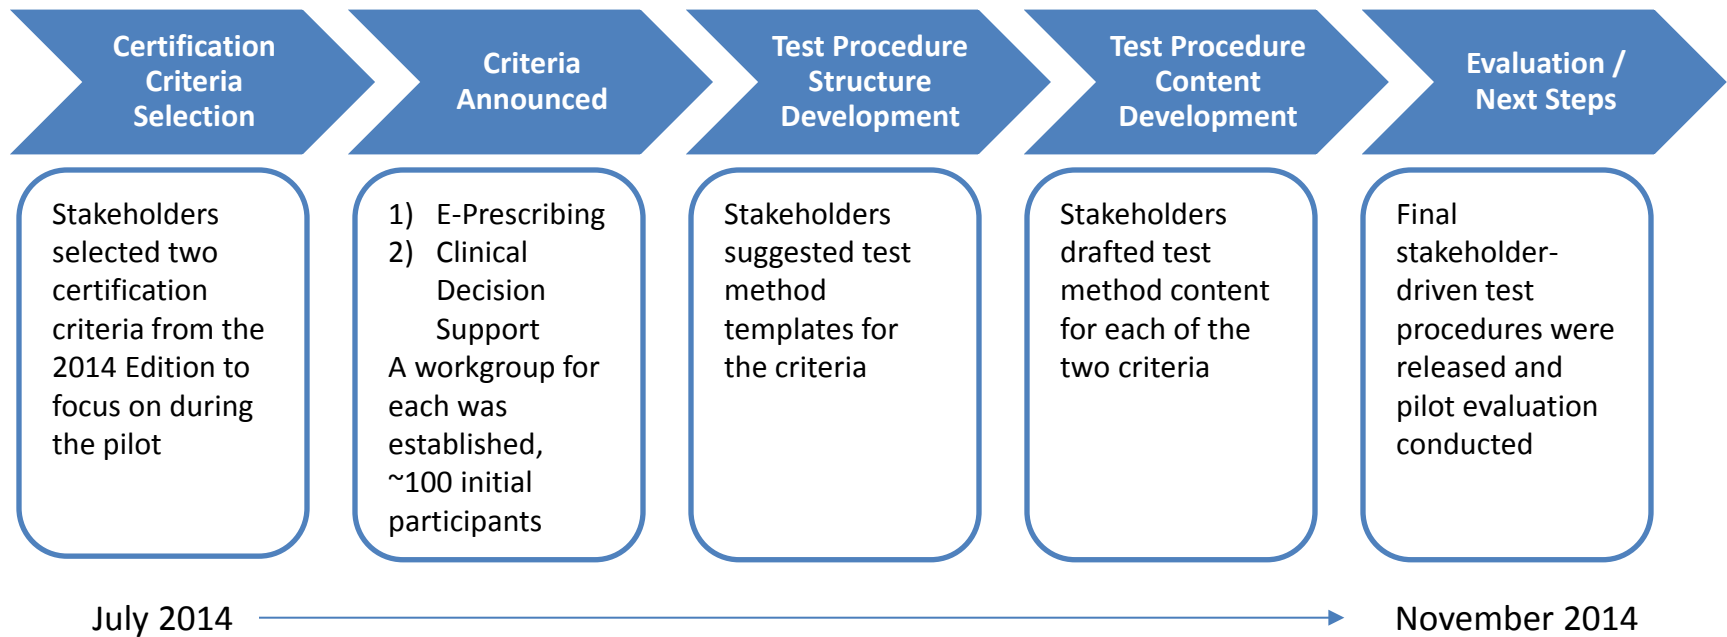

# Certification Program Open Test Method Pilot

## Goal & Process

Health IT Standards Committee  
A Public Advisory Body on Health Information Technology  
to the National Coordinator for Health IT

Goal: To create new test methods through an open community-led, development process

- Conclusion: new test procedures did not significantly differ from current / original
- Participant feedback indicated:
  - Prefer to react to test procedures rather than create completely “from scratch”
  - Participants appreciated the transparency and requested that such a transparent approach continues with longer public comment periods
  - Participants expressed a desire for eRx to be scenario based
