# INTRODUCTION

Lara Sinicropi-Yao, Co-Founder and COO at PatientPing

Interoperability is at the core of what we do

**Mission: To help transform our country's health care system to be the highest quality and lowest cost by empowering providers to more seamlessly coordinate care with one another**

PATIENTPING

# INTEROPERABILITY CHALLENGES

**Challenge:** Legacy IT infrastructure and clinical workflows that do not assume interoperability

**Challenge:** Incomplete financial incentives to engage providers and advance interoperability

**Challenge:** Limited Access to real-time, actionable information about when and where patients receive care

PATIENTPING

# PROPOSED SOLUTIONS

**Solution:** Advance and expand provider engagement in interoperability efforts

**Solution:** Implement technology solutions that are focused on addressing real business needs

**Solution:** Promote policy solutions that use consistent outcome-based metrics in order to fully align incentives
