

Electronic Transition of Care 2014 “Normal Operations” (about time)

**Stasia Kahn MD
Symphony Medical Group**

ToC Normal Operations

- Is it possible?
- Yes! 14 Consulting Physicians, 2 Facilities both outbound and inbound electronic messages
- Is the bar set to high? Too soon to tell for most EP's but for this provider the data is promising (42 days into 90 day reporting period)
- Part 1- 82% (required 50%)
- Part 2 -27% (required 10%)

Necessary Tools

- Vendor Supplied Transition of Care Tool
Functionalities: provider search, referral document, attachment selection based on the unique needs of the problem being addressed
- Vendor Supported Provider Network
- Tenacious Physician Champion (see handouts P2P MD and Facility Work Flow and P2P follow-up letter)

Nice to have Tools

- Access to HISP to HISP exchange
- Widespread Community Participation in State or Regional HIE

Obstacles to Success

- Physicians hesitant to accept role of medical records technician
- Lack of HIE participation among local community
- Physician/vendor community has limited understanding of the terms “direct”, “bundles of trust”, “HISP to HISP” exchange
- Vendor Fees

Questions Welcomed
