

EXHIBIT 1 JONES DEPOSITION

**ED NOTE**

PATIENT NAME: Hurten, Ima  
DATE OF ADMISSION: 3/03/2005  
EMERGENCY PHYSICIAN: Stephanie Jones, M.D.  
Admitted: 10:50 Discharged: 12:30

VITALS: Blood pressure is 185/76, pulse 59, respiratory rate 18, temperature is 97.  
Room air oxygen, saturation is 100%.

HPI: This is a 34-year-old female patient who presents here following a motor vehicle accident suffering a whiplash injury. She was brought to the ED by EMS workers with a cervical collar/board in place. It occurred earlier today. No seatbelt. The patient was examined and neurologically cleared before board and collar removed. No headache. No current neck pain. Patient able to move neck left and right.

ALLERGIES: NKDA.  
MEDICATIONS: Include Lipitor, aspirin.

PHYSICAL EXAM:

General Appearance: Patient had abrasions on the face. Initially complained of neck soreness, now fine. Normal neuro exam.

Skin: warm, dry.

Neck: Collar in place, neuro exam normal.

Chest: Lungs are resonant to percussion, w/o wheezes, rhonchi or crackles. Normal diaphragmatic excursion.

Cardiac: Regular no gallop, murmur.

Abdomen: Abdomen is soft, NT/NO, no bruit or hepatomegaly.

Genitourinary: Normal

Extremity: Lower extremities are warm, palpable pulses, trace edema. Brace on left leg/foot.

Neurological: Alert, oriented.

DIAGNOSIS: Abrasion, whiplash injury.

PLAN: The abrasion was cleaned thoroughly and it was dressed with a sterile dressing. She will follow up with her orthopedist this week preferably tomorrow. Follow up with her primary as well.
