ONC CHPL 4.0 – EXPLORING THE NEW INTERFACE

1.0 CHPL 4.0 OVERVIEW

The ONC Certified HIT Product List (CHPL) is the authoritative, comprehensive listing of health information technology products that have been tested and certified under the Health IT Certification Program maintained by The Office of the National Coordinator for Health IT (ONC). Once technology has been successfully tested and certified through the ONC HIT Certification program it is submitted for display on the CHPL. ONC compiles information submitted from ONC-Authorized Certification Bodies (ONC-ACBs) to generate a public, centralized, comprehensive list of certified HIT products. The CHPL also provides health care providers and hospitals to generate CMS EHR Certification IDs used in Electronic Health Record (EHR) Incentive programs through CMS and Stage agencies. Version 4.0 of the CHPL was designed to provide a more streamlined user interface experience and improve upon previous designs and implementations of the CHPL.

NEW INTERFACE

There is a new user interface for the CHPL website that features an updated design and streamlined operations. This document will detail the updated workflow and explain how the new site functions in relation to the previous CHPL website. The first change can be noticed on the home page. In the previous CHPL, the user was asked to select one of three certification options: 2011, 2014, and Combination 2011 and 2014. The new CHPL site will allow users to search directly from the home page. The user does not need to specify the type of certification they are trying to obtain. The selection of Certification Edition will happen via filtering on the Updated CHPL page.

Previous CHPL Home Page

Updated CHPL Home Page
The CMS EHR Certification ID is the identification number that represents the combination of Certified Health Information Technology that is owned and used by providers and hospitals to provide care to their patients. The CMS EHR Certification ID can only be generated on the CHPL once the minimum program requirements are met by the combination of Certified Technology selected. The CMS EHR Certification ID can be used to participate in CMS and other EHR Incentive programs once it has been successfully generated.

The process for obtaining the CMS EHR Certification ID has changed, and we will identify the main differences in the process below.

**HOW TO OBTAIN CMS EHR CERTIFICATION ID**

This section will detail how eligible hospitals and providers can obtain a CMS EHR Certification ID number in the new site and identify steps that may have changed.

There are four steps necessary to obtain a CMS EHR Certification ID once the user has accessed the CHPL website: [http://www.healthit.gov/chpl](http://www.healthit.gov/chpl)

1. Product Search
2. Select Products
3. Review Progress
4. Obtain CMS EHR Certification ID

**STEP 1: PRODUCT SEARCH**

The search function is not much different in the new CHPL from the previous version. There are three main search options available on the CHPL. First, you can search by **Product Name**, **Vendor Name**, or **CHPL Product Number**. If you choose not to search, but would rather like to browse all certified products, click the 'View All
Products’ option underneath the main search area. With any of the search options, the CHPL will display the first 10 products, listed alphabetically by product name. Once the list of products displays in the search results window, the user can sort the list by any of the available column headings.

The main difference is the look and feel of the search as shown below:
The new CHPL is very different in the way it displays search results. In the previous CHPL, search results are displayed as shown below:

The new CHPL has a new search result filtering option. There are several filters available on the left side navigation on the search results screen. This feature allows the user to filter the search results in real time according to the following filtering criteria:

1. Certification Edition
2. Practice Type
3. Classification
4. Certified Criteria
5. Certified CQMs
STEP 2: SELECT PRODUCT(S)

ON the previous CHPL products were selected by adding them to ‘the cart’. This was done by clicking the ‘add to cart’ link on the product search results list. Once a product was added to the cart, the following screen would display:
In the new CHPL, once the user has identified a Certified Health IT product for selection, through any of the search options, they will click the check box next to the product name to finalize its selection. Once this box is checked, the product progress drop down window will display from the top of the screen. This product progress window will automatically and dynamically update with products that are added or removed from selection while on the CHPL. To minimize the progress window, click the up arrow. Products can be added or removed at any time. In order to successfully remove a product which has been added while in the progress window, click the red X icon located next to the product’s name.
STEP 3: REVIEWING THE PROGRESS

In the previous CHPL, the cart page would show a user if they have met the minimum number of criteria necessary to obtain the CMS EHR Certification ID. However, in the new CHPL there is no cart or cart page. The user can check their progress as described below.

Once a product has been selected, the user can select ‘See Progress’ to view the Progress page and view current status in relation to meeting necessary requirements to obtain a CMS EHR Certification ID. This page lists all certified products that have been selected. The Attestation indicators help the user view what certification criteria the selected products have fulfilled. All necessary criteria must be fulfilled before the user can obtain the CMS EHR Certification ID.
STEP 4: OBTAIN CMS EHR CERTIFICATION ID

In the original CHPL, as well as the new CHPL, once the user has fulfilled the criteria necessary for attestation, the CHPL website will activate the ‘Get Certification ID’ button and the CHPL will generate and display a CMS EHR Certification ID which is representative of the combination of products selected.

As with the previous CHPL, clicking this button is the only way to receive the CMS EHR Certification ID. If the button can’t be clicked, the user should check the Progress Page to check that all requirements have been met. Once the ID is generated a user can email or print the number for their records and safe keeping. The number is not saved on the CHPL, so if a user needs to re-create the number for any reason all of the previously selected products must be selected again to generate the CMS EHR Certification ID again.

Images of the previous and CMS EHR Certification ID page are shown below.
Your CMS EHR Certification ID is: 1314E01PL14GEAD

The following products were used to obtain your CMS EHR Certification ID:

<table>
<thead>
<tr>
<th>Certification Body</th>
<th>Originating Practice Type</th>
<th>Vendor</th>
<th>Product</th>
<th>Product Version</th>
<th>Product Certification</th>
<th>Additional Software Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>KISA Labs</td>
<td>Ambulatory</td>
<td>Name Capital Partners</td>
<td>1 Certified Build/EMR</td>
<td>1.0</td>
<td>Complete EHR</td>
<td>Microsoft HealthVault</td>
</tr>
</tbody>
</table>

Saving Your Product List:
Please note that when you close your browser window, the list of product(s) in your cart will not be saved. If you would like to email the product list to yourself, enter your email address below and click "Email Me". Your email address will not be saved or used by the CHPL in any way other than to email the product list.

Your email address: [Email Address]

About this atestation page:
- Your EHRs (above 10% of the internet-eligible, face-to-face EHRs in the Medicare and Medicaid EHR Incentive Programs) must be certified.
- You may request to change your Product Certification ID.

CMS EHR Certification ID: 1914E000G0R98K

Submit this as part of the attestation process to the CMS EHR Incentive Programs. You will receive a completion notice in the mail for your facility.

Additional certifications may also be needed in order to meet submission requirements for Medicaid and Medicare programs.
