Health Information Technology

ONC CHPL 4.0 – EXPLORING THE NEW INTERFACE

1.0 CHPL 4.0 OVERVIEW

The ONC Certified HIT Product List (CHPL) is the authoritative, comprehensive listing of health information technology products that have been tested and certified under the Health IT Certification Program maintained by The Office of the National Coordinator for Health IT (ONC). Once technology has been successfully tested and certified through the ONC HIT Certification program it is submitted for display on the CHPL. ONC compiles information submitted from ONC-Authorized Certification Bodies (ONC-ACBs) to generate a public, centralized, comprehensive list of certified HIT products. The CHPL also provides health care providers and hospitals to generate CMS EHR Certification IDs used in Electronic Health Record (EHR) Incentive programs through CMS and Stage agencies. Version 4.0 of the CHPL was designed to provide a more streamlined user interface experience and improve upon previous designs and implementations of the CHPL.

NEW INTERFACE

There is a new user interface for the CHPL website that features an updated design and streamlined operations. This document will detail the updated workflow and explain how the new site functions in relation to the previous CHPL website. The first change can be noticed on the home page. In the previous CHPL, the user was asked to select one of three certification options: 2011, 2014, and Combination 2011 and 2014. The new CHPL site will allow users to search directly from the home page. The user does not need to specify the type of certification they are trying to obtain. The selection of Certification Edition will happen via filtering on the Updated CHPL page.

Previous CHPL Home Page   Updated CHPL Home Page

2.0 CMS EHR CERTIFICATION IDENTIFICATION NUMBER

The CMS EHR Certification ID is the identification number that represents the combination of Certified Health Information Technology that is owned and used by providers and hospitals to provide care to their patients. The CMS EHR Certification ID can only be generated on the CHPL once the minimum program requirements are met by the combination of Certified Technology selected. The CMS EHR Certification ID can be used to participate in CMS and other EHR Incentive programs once it has been successfully generated.

The process for obtaining the CMS EHR Certification ID has changed, and we will identify the main differences in the process below.

HOW TO OBTAIN CMS EHR CERTIFICATION ID

This section will detail how eligible hospitals and providers can obtain a CMS EHR Certification ID number in the new site and identify steps that may have changed.

There are four steps necessary to obtain a CMS EHR Certification ID once the user has accessed the CHPL website: http://www.healthit.gov/chpl

1. Product Search
2. Select Products
3. Review Progress
4. Obtain CMS EHR Certification ID

STEP 1: PRODUCT SEARCH

The search function is not much different in the new CHPL from the previous version. There are three main search options available on the CHPL. First, you can search by *Product Name*, *Vendor Name*, *or CHPL Product Number*. If you choose not to search, but would rather like to browse all certified products, click the 'View All

Products' option underneath the main search area. With any of the search options, the CHPL will display the first 10 products, listed alphabetically by product name. Once the list of products displays in the search results window, the user can sort the list by any of the available column headings.

The main difference is the look and feel of the search as shown below:

SEARCH RESULTS

The new CHPL is very different in the way it displays search results. In the previous CHPL, search results are displayed as shown below:

The new CHPL has a new search result filtering option. There are several filters available on the left side navigation on the search results screen. This feature allows the user to filter the search results in real time according to the following filtering criteria:

1. Certification Edition
2. Practice Type
3. Classification
4. Certified Criteria
5. Certified CQMs

STEP 2: SELECT PRODUCT(S)

ON the previous CHPL products were selected by adding to them to 'the cart'. This was done by clicking the 'add to cart' link on the product search results list. Once a product was added to the cart, the following screen would display:

Certified Health **IT** Product List

The Office of the National Coordinator for Health Information Technology
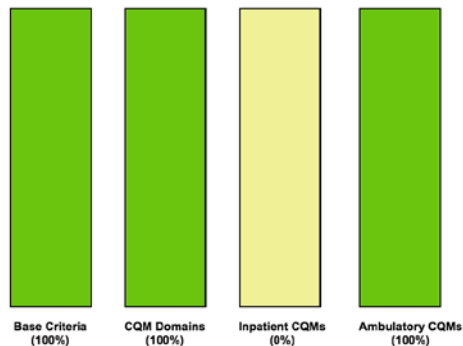

Selected Attestation : **2014 Edition**

STEP 4: REQUEST CMS EHR CERTIFICATION ID

Certification Bar Summary

The certification columns provide a summary of the certification criteria required to satisfy the Base EHR definition, CQM domains, inpatient CQMs, and ambulatory CQMs that are met by product(s) in your cart. The columns filled in green represent the percentage of Base EHR criteria, CQM domains, inpatient CQMs, and ambulatory CQMs met by the product(s) in the cart, columns filled in yellow represents the unmet percentage.

Place your mouse over the individual columns for Base EHR criteria, CQM domains, inpatient CQMs, and ambulatory CQMs to view the corresponding detailed certification summary. You can also place your mouse over or click the individual items in the detailed certification bar to learn more. Base EHR criteria, CQM domains, inpatient CQMs and ambulatory CQMs highlighted in blue have been met by product(s) in the cart, items in gray have not.

Requesting Your CMS EHR Certification ID

If the product(s) in your cart meet 100% of the required Base EHR criteria, CQM domains, and either inpatient or ambulatory CQMs, you can then obtain a CMS EHR Certification ID.

If the product(s) in you cart do not meet 100% of the required 2014 criteria, click "Return to Search Options" link and continue to add additional products.

[Get CMS EHR Certification ID]

The Base EHR definition must be satisfied in order to meet the CEHRT definition. Note: Certification criterion for Accounting of Disclosures (§ 170.314(d)(9)) is optional for systems or technologies seeking certification. Thus, even if 'd9' is gray in your certification bar, the product(s) in your cart can still meet 100% of the required certification criteria.

For an EH or CAH, EHR technology needs to be certified for no fewer than 16 CQMs that cover at least 3 domains as identified in the Stage 2 final rule.

For an EP, the EHR technology needs to be certified for no fewer than 9 CQMs that in total cover at least 3 domains and include at least 6 CQMs from the recommended "core set" for adult and pediatric populations as identified in the Stage 2 final rule.

Base Criteria (100%)   CQM Domains (100%)   Inpatient CQMs (0%)   Ambulatory CQMs (100%)

Certifying Body	Original Practice Type	Vendor	Product	Product Version #	Product Classification	Additional Software Required	
ICSA Labs	Ambulatory	Nemo Capital Partners	1 Connect BuildYourEMR	5.0	Complete EHR	Microsoft HealthVault, Windows Operating System	Remove

In the new CHPL, once the user has identified a Certified Health IT product for selection, through any of the search options, they will click the check box next to the product name to finalize its selection. Once this box is checked, the product progress drop down window will display from the top of the screen. This product progress window will automatically and dynamically update with products that are added or removed from selection while on the CHPL. To minimize the progress window, click the up arrow. Products can be added or removed at any time. In order to successfully remove a product which has been added while in the progress window, click the red X icon located next to the product's name.

STEP 3: REVIEWING THE PROGRESS

In the previous CHPL, the cart page would show a user if they have met the minimum number of criteria necessary to obtain the CMS EHR Certification ID. However, in the new CHPL there is no cart or cart page. The user can check their progress as described below.

Once a product has been selected, the user can select 'See Progress' to view the Progress page and view current status in relation to meeting necessary requirements to obtain a CMS EHR Certification ID. This page lists all certified products that have been selected. The Attestation indicators help the user view what certification criteria the selected products have fulfilled. All necessary criteria must be fulfilled before the user can obtain the CMS EHR Certification ID.

Office of the National Coordinator for Health Information Technology

STEP 4: OBTAIN CMS EHR CERTIFICATION ID

In the original CHPL, as well as the new CHPL, once the user has fulfilled the criteria necessary for attestation, the CHPL website will activate the 'Get Certification ID' button and the CHPL will generate and display a CMS EHR Certification ID which is representative of the combination of products selected.

As with the previous CHPL, clicking this button is the only way to receive the CMS EHR Certification ID. If the button can't be clicked, the user should check the Progress Page to check that all requirements have been met. Once the ID is generated a user can email or print the number for their records and safe keeping. The number is not saved on the CHPL, so if a user needs to re-create the number for any reason all of the previously selected products must be selected again to generate the CMS EHR Certification ID again.

Images of the previous and CMS EHR Certification ID page are shown below.

CMS EHR CERTIFICATION ID

Your CMS EHR Certification ID is: 1314E01PL14GEAD

An Eligible Professional (EP) or Eligible Hospital (EH) that chooses to participate in the Centers for Medicare and Medicaid (CMS) EHR Incentive Programs must obtain a CMS EHR Certification ID. You may submit this CMS EHR Certification ID at the time of registration, but must submit it as part of the attestation process for Medicare and Medicaid (CMS) EHR Incentive Programs.

Please return to the Medicare and Medicaid EHR Incentive Program and enter this CMS EHR Certification ID when prompted for an "EHR Certification Number" on the appropriate registration or attestation screen.

Please do not refresh this page. Refreshing the page may remove EHR products from your certification cart and result in an incorrect CMS EHR Certification ID. Click on the 'Return to CHPL Home' link above to access the CHPL homepage.

YOUR CERTIFIED EHR PRODUCT(S)

The following products were used to obtain your CMS EHR Certification ID:

Certifying Body	Original Practice Type	Vendor	Product	Product Version #	Product Classification	Additional Software Required
ICSA Labs	Ambulatory	Nemo Capital Partners	1 Connect BuildYourEMR	5.0	Complete EHR	Microsoft HealthVault, Windows Operating System

Saving Your Product List

Please note that when you close your browser window, the list of product(s) in your cart will not be saved. If you would like to email the product list to yourself, enter your email address below and click "Email Me". Your email address will not be saved or used by the CHPL in any way other than to email the product list.
