

ONC Standards Update

Health IT Standards Committee Meeting January 16, 2013

Doug Fridsma, Office of Science and Technology, ONC

S&I Initiative Portfolio Snapshot

	Pre-Discovery	>	Use Case	>	Harmonization	>	RI, Test & Pilot	t >	Evaluation
Direct Project (S&I Archetype)									
Transitions of Care									Balloted
Lab Results Interface									Balloted
Query Health									
Provider Directories									
Data Segmentation for Privacy									
Public Health Reporting									
esMD									
Longitudinal Coordination of Care									
Laboratory Orders Interface									
Health eDecisions									
Automate Blue Button (ABBI)									1

S&I Framework Updates

- SDO Activities
 - IG's for LRI and ToC successfully balloted
 - HQMF V2 under ballot

- esMD
- LOI/eDOS
- Query Health (Pilots)
- Longitudinal Care Coordination
- PHRI

Initiatives Completed

- ToC
- LRI
- Provider Directory

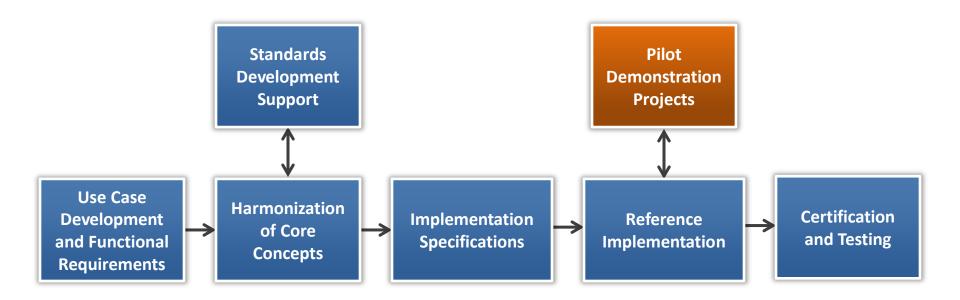

Support Activities:

- Test data generation activities for MU2
- CCDA Guide for BEACONS

Current State of Standards Testing

Current Process:

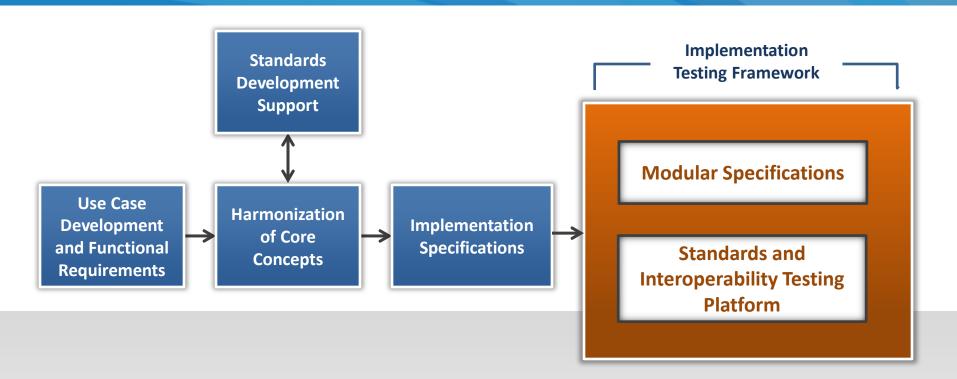

Pilot demonstration projects provide validation of standards for national deployment

Challenges:

- Testing of standards occurs for the first time during pilot demonstration
- Testing of standards occurs much too late in the process to influence standards development
- Changes to standards made during pilots ("Learning") don't get back into improving standards in timely manner
- Implementing untested standards introduces business risk to pilot organizations

Pre-certification Testing of Standards – Proposed in FY 2013 OST Budget

Modular Specifications:

- Ensures testability and internal consistency of standards
- Refines standards through conformance analysis against underlying specifications

S&I Testing Platform:

- Validate standards in a full use case, rather than a unit test
- Provide a platform of modular components enabling rapid adjustment of testing use cases

S&I Framework: FY 2013 Plans

S&I Initiatives – aligned with MU3 needs

- Public Health Reporting
- Healthy eDecisions IG Balloting
- Launch PCOR initiative
- PDMP

Cross-S&I Activities

- NIEM Health Domain
 - Formalize an approach to align with CEDD/FHIM/
- Generate a robust patient data set for use across initiatives and testing
- Support Quality Measures work with OCMIO

Staff Development

- Continue building standards expertise in-house
- Assess and plan for emergent needs for the organization
- Increase engagement across ONC offices

eHealth Exchange Strategic Road Map

Phase 1 Phase 2 Phase 3 Initial Rollout (2009 – 2011) Mature, Grow, Scale 2012-2013 Sustainability 2014

- Early adopters
- Federal business cases
- Shared infrastructure
- Early lessons learned
- Success / viability
- ONC program pilot concludes
- Production ramps up

- Transition to publicprivate model
- Grow participation and transactions
- Refine and scale
- Expand value cases
- Align with NwHIN governance
- Implement sustainability model

- Continued growth in participant and transactions
- Revenue model sustains operations
- Nationwide deployment
- Interoperable exchange among private entities

Federal Health Architecture: Advancing National Health IT

FHA in 2012: Strategy and Architecture

New Governance

- More strategic alignment within and across Federal partner agencies
- Greater transparency and enhanced communications
- Commitment to fulfilling original intent of FHA as E-Gov Line of Business

Strategy Planning

- FHA Strategic Plan nearing completion
- FHA Line of business (LoB) Service Plan delivered to OMB

Interoperability Architecture

- Identify current and planned data exchanges among Federal agencies and partners
- Develop FHA public-facing portal
- Align with standards harmonization efforts (e.g. Standards and Interoperability Framework)
- Demonstrate exchange methods beyond Direct and SOA RHEx pilots

Federal Health Architecture: Advancing National Health IT

FHA in 2012: Innovations

- CONNECT Open Source
 - CONNECT code on GitHub, sprint sessions open
 - Engaging open source community through code-a-thons, encouraging code contributions
 - Developing CONNECT 4.0, incorporating Direct specifications
- RESTful Health Exchange (RHEx)
 - Two pilots
 - TATRC
 - HealthInfoNet

ONC Program Update

Health IT Standards Committee Meeting January 16, 2013

Jodi Daniel, Office of Policy and Planning, ONC

Meaningful Use – Professionals Registered and Paid

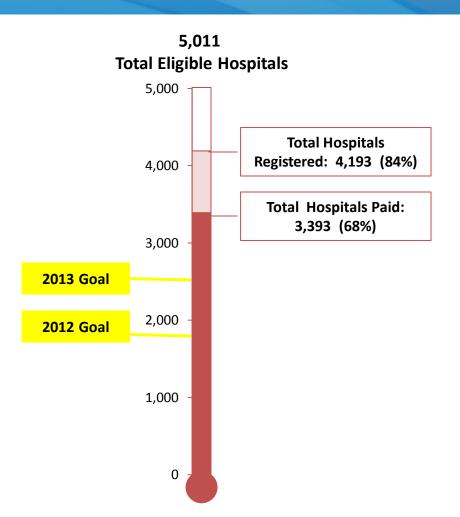

521,600 Total Eligible Professionals

Source: CMS EHR Incentive Program Data as of 11/30/2012

Meaningful Use – Hospitals Registered and Paid

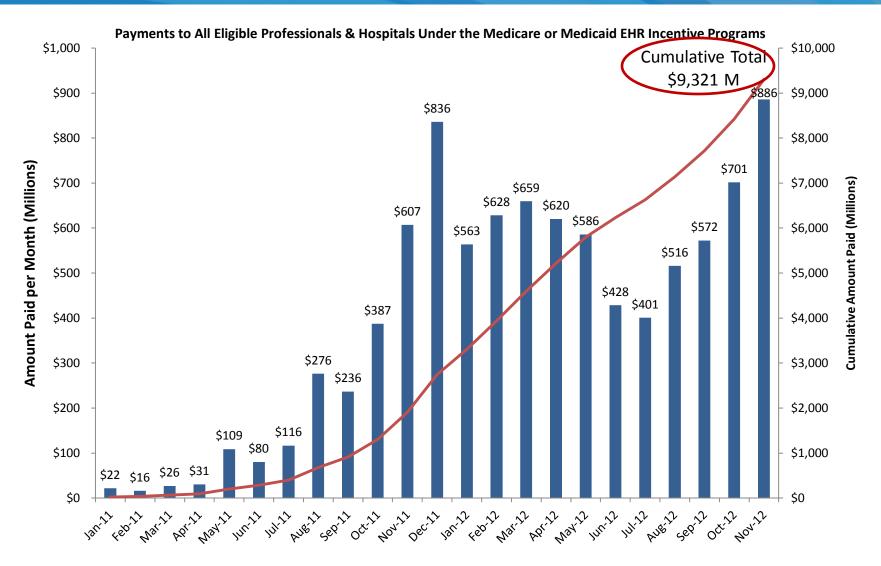

Source: CMS EHR Incentive Program Data as of 11/30/2012

Total EHR Incentive Payments to All Eligible Professionals & Hospitals by Month

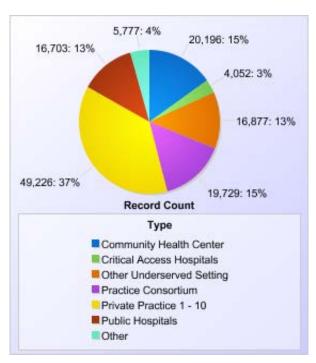

Source: CMS EHR Incentive Program
Data as of 11/31/2012

Regional Extension Center Success to Date

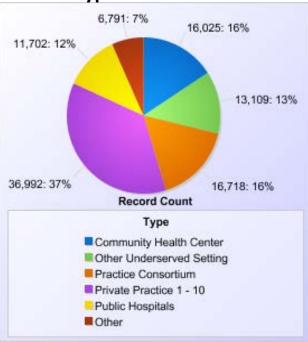

Providers working with RECs by Practice Type

- Over 132,000 Primary Care Providers
- ≈ 40% of all providers in the US
- ≈ 60% of all rural providers
- ≈ 85% of FQHC providers Graph Doesn't include 10,000
- + specialist working with RECs

Providers working with REC who have achieved Meaningful Use by Practice Type

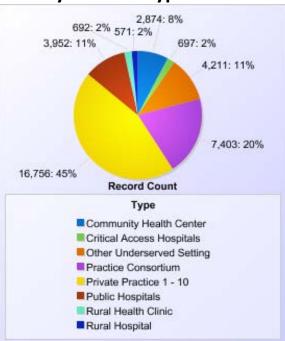

- Over 101,000 Primary Care Providers
- GAO found that 47% of providers who Received AIU payments were working With REC

NOTE: Primary Care Providers include individual/small group primary care practices (<10 PCPs); Public Hospitals and CAHs; Community Health Centers and Rural Health Clinics; Other settings that serve medically underserved populations

Data Source: ONC CRM January 4, 2012

Providers working with REC who have achieved Meaningful Use by Practice Type

- Over 37,000 Primary Care Providers
- GAO found that Medicare providers Working with RECS were over 2 times More likely to receive payment then those who weren't working with an REC

Health Information Exchange

- 94% of pharmacies are actively e-Prescribing
- 43 states and territories have directed exchange
 - 60,359 clinical and administrative staff nationwide have access to directed exchange
 - During Q3 2012 there were <u>79,957,695</u> directed exchange messages
- 20 states have statewide query-based exchange
 - 12 additional states have query-based exchange within regions (but not statewide)
 - 71,610 clinical and administrative staff nationwide have access to query-based exchange
 - During Q3 2012 there were <u>2,794,705</u> patient queries
- Only 4 states and 4 territories report not having any directed or query-based exchange
- Consent guidance issued to ONC State HIE grantees based on HITPC recommendations

Beacon Community Update

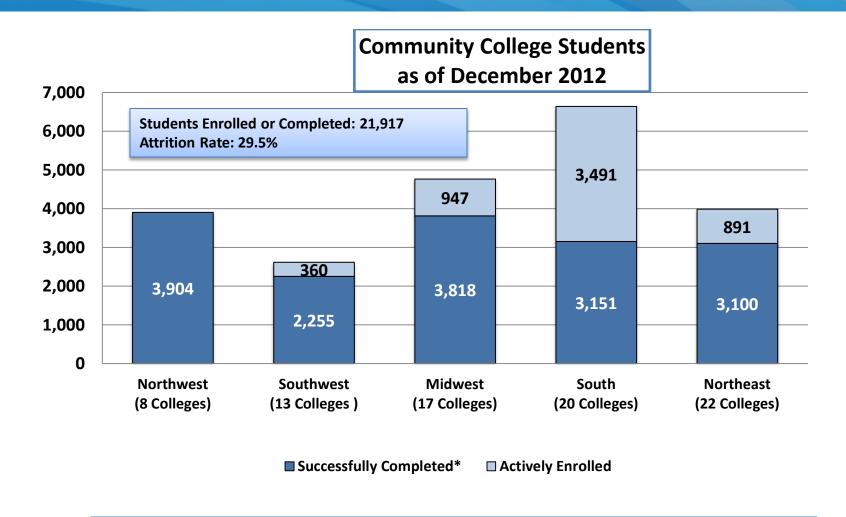

Featured successes include:

- Early results featuring improvements in quality, cost and population health (all 17 communities have at least 2 measures trending positively)
- Launch of new exchange capabilities in communities like New Orleans and San Diego
- Innovative methods to engage patient through remote patient monitoring and mobile health
- Collaboration between 8 Beacon Communities and 6 EHR vendors to advance interoperability and exchange
 - The collaboration has now enabled 51 primary care practice locations representing 432 providers and 447,000 patients to exchange a consistent patient summary care document to better manage transitions of care and to populate community data repositories or registries
- For more information, view the Fact sheets demonstrating progress for each of the 17 Beacon Communities (<u>www.healthit.gov</u>)

Workforce Training – Community College Program Enrollment and Graduation

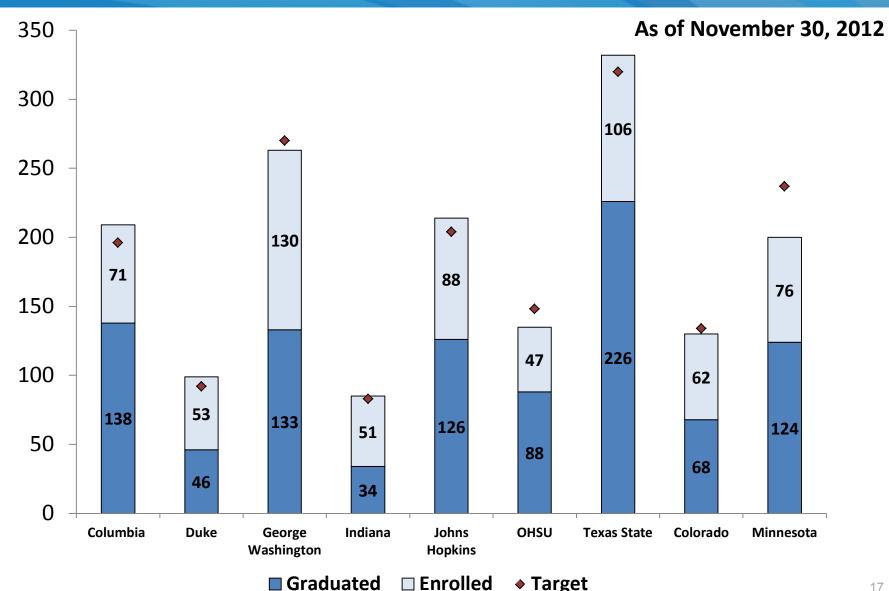

^{*} Enrollment to date includes unique students reported in November 2012 cycle

Workforce Training - University-Based Program Enrollment & Graduation

Consumer eHealth

ACCESS

- 88 million Americans have access to Blue Button
- 1.4 million Blue Button downloads
- 450 organizations joined the Blue Button Pledge Program

ACTION

- 68 volunteer organizations joined Automate Blue Button S&I Framework Initiative #ABBI
- 230 submissions for the Health Record Design Challenge
- 3 Winning Apps from the Blue Button Mash-up Challenge
- Model PHR Privacy Notice

ATTITUDES

- **100,000** views of the Healthy New Year Video Contest alone. Ran six more video contests throughout 2012.
- 14,000 views of Health IT Animated
 Video
- 1,400 participants in the first Annual Consumer Health IT Summit in September 2011.
- Pilot to evaluate the role of patients in improving accuracy of information in medical record
- Hearing and report on Patient Generated Health Data
- 3 Innovation roundtables (Cancer Care, Gaming, Patient Access Summit)
- Interactive Strategic Plan (coming in late Feb 2013)

Policy and Planning

- Final Rules for Meaningful Use Stage 2 and 2014 Edition Standards & Cert Criteria
- Request for Comment (RFC) for Meaningful Use Stage 3
- Health IT Patient Safety Action & Surveillance Plan Released
- Using information from RFI on governance for nationwide health information exchange to develop a non-regulatory
- Progress made in making PDMP information available electronically in real-time for prescribers and dispensers

Certification Update: 2014 EDITION Testing

ONC transitioned to the Permanent Certification Program in 2012.

ONC completed development of the 2014 Edition Test Method materials, in close collaboration with the National Institute of Standards and Technology (NIST).

- Seven waves of draft test procedures, test data and test tool were released for public review and input between September 2012 and November 2012.
- The revised 2014 Edition Test Method materials were approved for use on December 14th 2012 by the National Coordinator and feature:
 - √ 49 Test Procedures (17% more than the 2011 Edition)
 - ✓ 29 ONC-supplied Test Data sets (100% more than 2011 Edition)
 - ✓ 9 Test Tools (over 5 times more than the 2011 Edition) –
 includes specialized toolsets for Clinical Quality Measures
 and HIE Transport Testing

Certification Update: CHPL Dashboard as of 01/03/2013

Total # of CHPL Products

CHPL Products	Ambulatory	Inpatient	Total
Complete EHR	1191	276	1467
Modular EHR	766	677	1443
Total	1957	953	2910

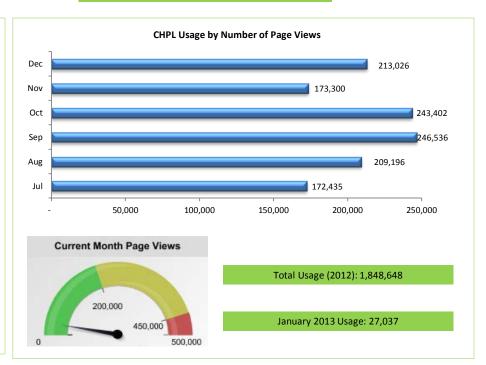

Total number of EHR Vendors is 920

% Growth for Total and Unique CHPL Products 7% 6% 5% 4% 3% 2% 1% 0% Oct July Aug Sep Nov Dec % Growth in # of total products → % Growth in # of unique products **CHPL** 2012 **Products** Jun Jul Aug Sep Oct Nov Dec Unique 1467 1511 1568 1600 1642 1663 1699 2434 2589 **Total** Total # of Unique Products have increased by 14 % in the last 6 months

of Products Added This Week (12)

E-Quality Measures (eCQM)

Align Measures

Across HHS Programs

Report Once

Get credit for many

Standardize

Built on common components: Logic
 & Value Sets

NOTE: Our long-term goals are to align the measures, simplify data submission, standardize components and empower improvement.

In 2012 our work focused on developing measures that leverage EHR technology, standardizing the measure components and supporting tools for vendors and providers that will drive care and quality improvement.

CMS has committed to A single core set of quality measures for: EP 2014 VBM, PQRS, MU2 and EH

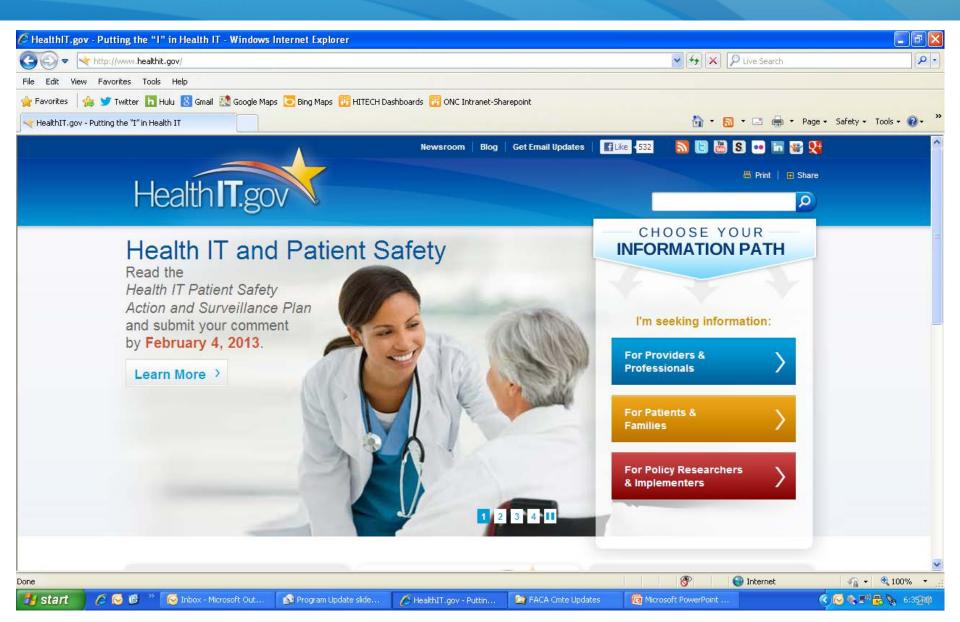

HHS Quality Improvement Tools

- CQM Developer and Implementer Tools
 - VSAC: Value Set Authority Center (NLM)
 - Posted every value set in every CQM in the 2014 set
 - DEC: Data Element Catalog (ONC/NLM)
 - Posted every data element in every CQM in the 2014
 Set
 - CYPRESS: Certification Testing Software (ONC)
 - Software that test vendor capture, calculation and submission
- Provider Tools: QI Population Dashboard
 - PopHealth: Patient-level view of e-measures
